

Did You KNOW

Bothwell's care extends beyond the hospital.

In today's health-care environment, patients often spend less time in the hospital, so it's more important than ever to have quality health care at home. Bothwell Regional Health Center provides comprehensive, medically coordinated care with our Home Health, Hospice and Medical Equipment Services. Whether you need nursing care, medical equipment at home, or gentle care for the transitions of a terminal illness, you can receive those services from the same people you know and trust with your hospital care. Home services are just another reason you should get to know more about our exceptional care.
