## **BOTHWELL WELCOMES NEW FACILITIES MANAGEMENT DIRECTOR**

Bothwell Regional Health Center recently announced that Darrell Lamb has been named Director of Facilities Management. In his new role, Lamb will oversee the many aspects of managing the hospital's many facilities, including maintenance, design and construction, safety and security.

Lamb has 34 years of experience in hospital facilities management. He previously was director of engineering for Mercy Hospital in Iowa City for 25 years.

"We are very happy to be able to bring someone with Darrell's experience to Bothwell," said Mark Hirshberg, Chief Operating Officer. "Because of the nature of the services we provide, the health center has very stringent requirements and regulations governing the management of our facilities. Darrell will be a valuable part of our team."

A certified plant manager, Lamb is also a Fellow of the American Society of Healthcare Engineering and served as a member of its board of directors in 2004.

Lamb most recently was president of Facility Management Services and Consulting, which provided services to hospitals seeking facility consulting, interim facility management and project development and implementation. He has done consulting work with hospitals in Iowa, Illinois, Ohio, Oklahoma, Texas, North Carolina and Connecticut.
