## **Introduction**

The Patient Protection and Affordable Care Act requires hospitals with a 501(c)(3) tax-exempt status to complete a community health needs assessment (CHNA) once every three years. They must solicit input from persons who represent the broad interests of the community served by the hospital, including those with special knowledge of, or expertise in, public health. Bothwell Regional Health Center solicited input using modalities such as surveys and focus groups comprised of individuals representing the broad interests of the community served. A review of the 2019 CHNA and the secondary data resources available from the [exploreMOhealth](https://exploremohealth.org/) platform (<https://exploremohealth.org/>) was conducted as required of the process. This report provides a thorough description of the following.

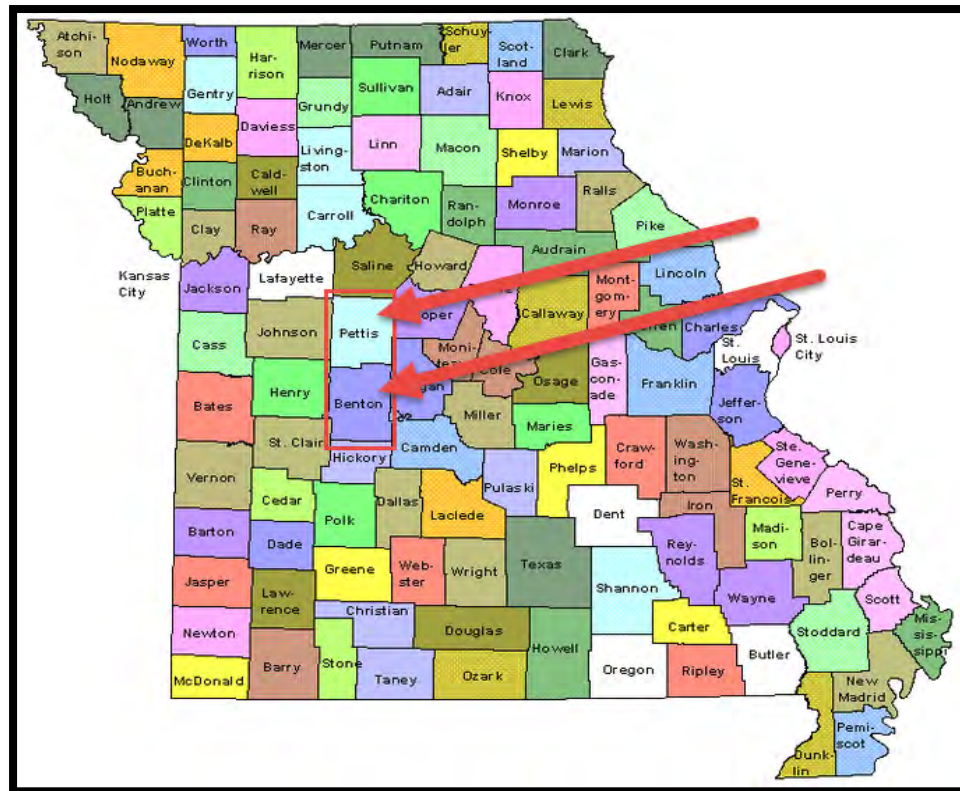

- The community served by the hospital
- Process and methods used to conduct the assessment
- Approach used to plan, develop, and conduct the assessment
- A prioritized description of all community health needs identified through the CHNA process
- A description of the existing health care facilities and other resources within the community available to meet the community health needs identified through the CHNA

The [exploreMOhealth](https://exploremohealth.org/) ZIP Health Rankings Report reveals the top health issues in Pettis and Benton counties respectively. The following dimensions of health were assessed to identify the current gaps for individuals, community and the population within the primary service areas: demographics, social and economic factors, behaviors, clinical care/access, environmental, mortality, and quality of life. This powerful and innovative platform revealed the following top health issues based on the ZIP Health Rankings Report for the FY 2018-2020 hospital inpatient, emergency department, and outpatients diagnosed cases per 1,000.

- Chronic Diseases
  - Arthritis
  - Cancer
  - Diabetes
  - Heart disease
  - Hypertension
  - Atherosclerosis

Secondary data analysis was conducted to help identify the top issues in the primary service areas served by Bothwell Regional Health Center. Given its innovative ZIP-code level analytics capabilities the [exploreMOhealth](https://exploremohealth.org/) platform was used to help identify disparities at the sub-county level. Having detailed, local information on health factors and outcomes in places where Missourians live can help stakeholders and partners take the appropriate actions to create and sustain healthy communities.

Primary data derived from the survey and information gathered from the focus groups were included in the analysis and overall report to help paint a clear picture of the issues facing this region. The 2019 CHNA findings were considered in the identification and prioritization of the 2022 top issues.

Source: Missouri Office of Administration

## **Executive Summary**

As a nonprofit hospital, Bothwell Regional Health Center is required by the Internal Revenue Service tax code to conduct a Community Health Needs Assessment (CHNA) every three years. The hospital must then use the findings from the CHNA to develop implementation strategies to address identified community needs. The purpose of the CHNA is to spur the creation of programs that improve the health of the communities served.

Bothwell collaborated with partners to collect primary and secondary data for this year's assessment to shape a picture of the health status and needs of the communities it serves. Primary data was gleaned from a survey and two focus groups that included community members interested in discussing and planning for healthier communities. Secondary data was derived from the previous year's CHNA and multiple sources on community health indicators in Bothwell's service area.

Residents live in a rural area that includes many unique qualities that allow the opportunity to experience and enhance their quality of life. Education and cultural experiences are readily available. Local secondary schools are strong and function as important cogs in their communities. State Fair Community College's (SFCC) flagship campus, located in Sedalia in Pettis County, has other locations throughout the central Missouri region. The Daum Museum of Contemporary Art at SFCC and the Liberty Center Association for the Arts provide arts and entertainment.

People seeking outdoor recreation can choose among many activities including a robust park system in Sedalia, biking, walking or riding on the Katy Trail, fishing in Clover Dell Lake, or fishing and water sports on nearby Truman Lake in Benton County. Sedalia is home to the Missouri State Fair, which attracts approximately 400,000 visitors annually. Opportunities for people to get involved in community activities exist in both Benton and Pettis counties.

The report that follows summarizes all data collected and highlights findings that Bothwell can use to leverage available resources and identify new opportunities to fill gaps in services and programs that keep residents in the communities healthy.

### **Prioritization Methodology**

Upon identifying the issues in need of attention, the prioritization criteria considered the magnitude of the problem, severity of the problem, health disparities, community assets, and the ability to leverage through collaboration with existing community partnerships. This methodology was used during the focus groups prioritization process.

After a careful review of the findings of the previous CHNA, current secondary data, survey results and the focus group findings, the following priority health issues were identified.

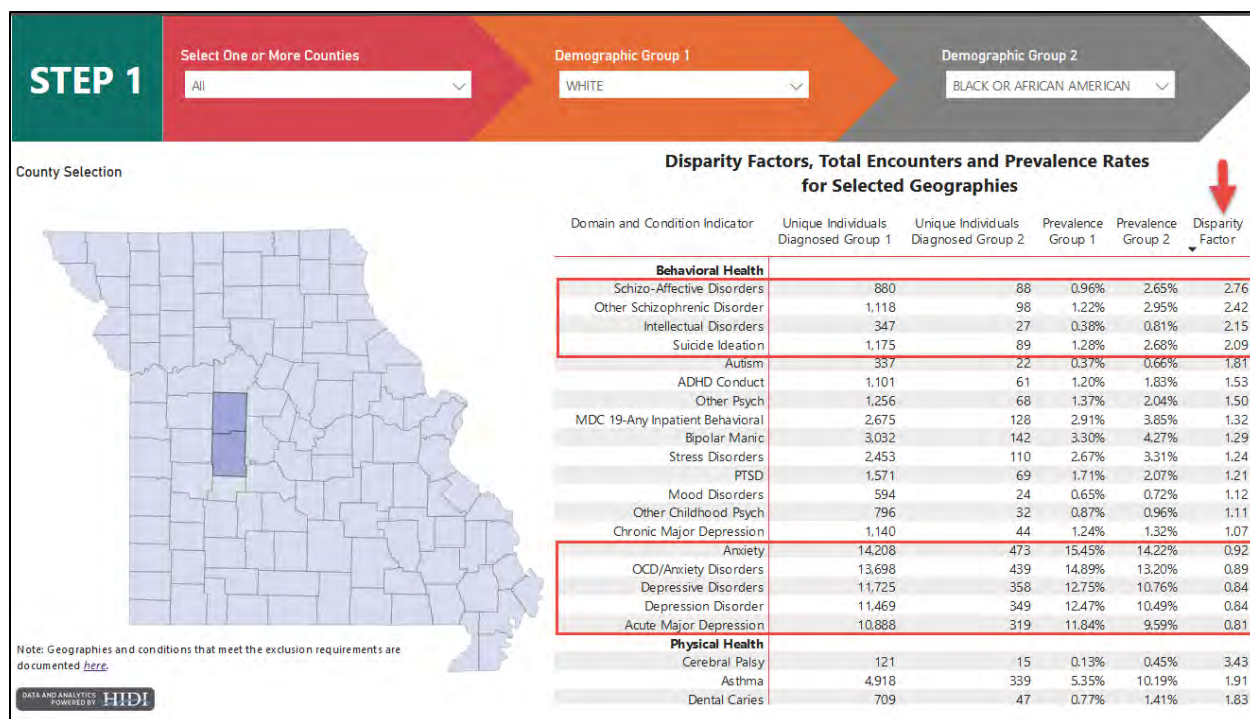

1. Mental Health
2. Substance Use
3. Heart Disease and Obesity

## **Mental Health**

Findings of the focus group meeting for both Pettis and Benton counties identified mental health as a priority health issue. A review of the recently completed CHNA survey results revealed that of the 315 respondents to this question, 46.03% reported this is the most pressing issue in their community. The 2019 CHNA identified mental health as a priority issue as well. According to the County Health Rankings and Roadmap, the ratio of mental health providers to patients in Benton County is significantly higher than the state at 1,300:1, compared to 490:1 for Missouri. As for Pettis County, the ratio is still higher than the state at 770:1, but lower than Benton County. Access to care requires not only financial coverage, but also access to providers. According to national data, nearly 30% of the population lives in a county designated as a Mental Health Professional Shortage Area. As the mental health parity aspects of the Affordable Care Act create increased coverage for mental health services, many regions continue to see increased shortages in mental health providers.

According to the 2021 Status Report on Missouri's Substance Use and Mental Health, both Pettis and Benton counties experienced an increase in the number of individuals who received psychiatric services when presented with anxiety and fear disorders, bipolar mood disorder, depressive mood disorder, developmental and age-related disorders, impulse control and conduct disorder, personality disorders, schizophrenia and psychotic disorders, trauma, and stress related disorder. A review of the top emergency department (ED) diagnoses revealed several mental health related conditions such as anxiety disorder and suicidal ideation. See the appendix for more details.

A review of MHA's Health Equity dashboards (<https://web.mhanet.com/health-equity-dashboards/>) provided a summary of the largest disparities in hospital claims-based health outcomes and health factors between different demographic groups within Pettis and Benton counties. On the following page is a screenshot depicting the top four behavioral health disparities for White and Black or African Americans in Pettis and Benton counties. On the same note, it shows the top mental health issues with the highest number of unique patients diagnosed.

## Substance Use

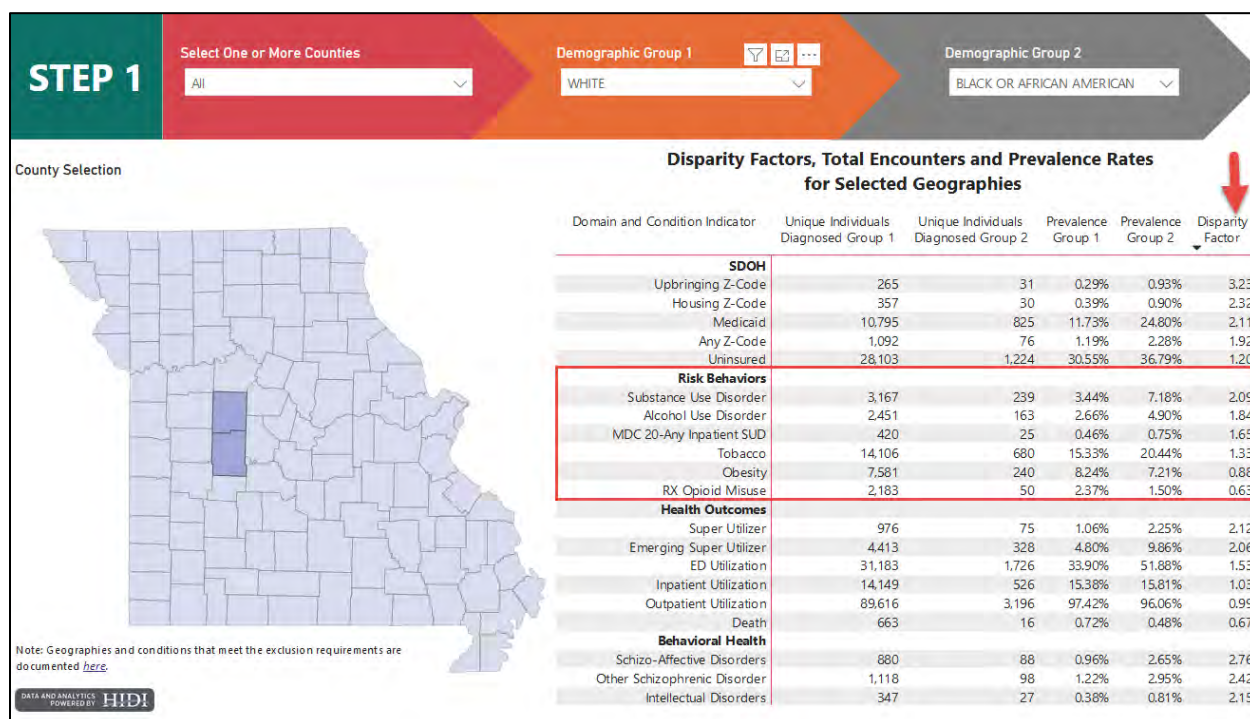

Focus group meeting findings for both Pettis and Benton counties identified substance abuse as a priority health issue. The recent CHNA survey showed that of the 315 respondents, 186 reported use of illegal substances was one of the most pressing issues in the primary service area covered by Pettis and Benton counties. On the same note, 103 felt that prescription medication abuse was a pressing issue. According to the 2021 County Health Rankings data from 2017-2019 for the drug overdose measure, Benton County had 21 deaths while Pettis County had 10.

It is worth noting that while drug overdose deaths are an important indicator of the size of prescription and illicit drug use, small numbers of deaths can result in unreliable and suppressed estimates at the county level, even with multiple years of combined data. Drug overdose deaths are a leading contributor to premature death and are largely preventable. The United States currently is experiencing an epidemic of drug overdose deaths. Since 2000, the rate of drug overdose deaths has increased by 137% nationwide. Opioids contribute largely to drug overdose deaths; since 2000, there has been a 200% increase in deaths involving opioids (opioid pain relievers and heroin). The 2019 CHNA identified substance use as a top issue and evidently continues to be a priority in the 2022 CHNA based on the data gathered from multiple sources.

A review of MHA's [Health Equity dashboards](#) provided a summary of the largest disparities in hospital claims-based health outcomes and health factors between different demographic

groups within Pettis and Benton counties. This dashboard identifies the top three risk behaviors with the highest disparities between White and Black or African Americans.

## Heart Disease and Obesity

A review of the primary survey results reveals that obesity was among the top health problems identified. Of the 315 individuals who completed the survey, 43% believed it was a problem among adults while 32% indicated it was a problem among children and teenagers. A further review reveals about 45% of respondents reported being told by their doctor they had high blood pressure and needed to lose weight for health reasons. On the same note, 22% reported to have been told they had high blood sugar or diabetes. All these health factors align with the secondary data, thus requiring a comprehensive approach in addressing them through diet and exercise. When asked about the types of health education services most needed in the community, diet and/or exercise was in the top categories. A review of the top 10 ED diagnoses, DRG's from the ED – inpatient, and observation diagnosis revealed a few metrics related to heart disease and other chronic conditions.

Secondary data supports the focus on chronic conditions as the general strategies deployed will be key to improving health outcomes in multiple areas beyond heart disease. The [exploreMOhealth](#) data reveals the following top chronic conditions namely, arthritis, cancer, diabetes, heart disease, hypertension and atherosclerosis, among others. The Robert Wood Johnson County Health Rankings 2021 report denotes both Pettis and Benton counties have higher rates of adult obesity at 41 and 34% respectively compared to the state rate of 33%. It is important to note that while Benton County has maintained the 2019 obesity rate, the Pettis

County rate has increased by 5%. Both have a higher percent of physical inactivity compared to the state.

These health factors have a strong upstream influence on health outcomes of mortality and morbidity. According to the County Health Rankings report derived from the [exploreMOhealth](#) platform, the percent of the adult population age 20 and older with a body mass index greater than or equal to 30 was 33.5% and 37% for Benton and Pettis counties respectively. County level study survey data from the Missouri Department of Health and Senior Services further reveals a higher percent of respondents reported their health was in fair or poor status in Benton County compared to Pettis County. From a population health management standpoint, there is a great opportunity for care coordination between health care organizations and community partners.

## Recommendations

Identifying specific populations and specific health behaviors and health outcomes that are influenced by the top three health issues will enable providers and the community to focus resources and attention on priority areas. Of greatest importance is access to coordinated care to promote primary and secondary prevention and chronic care management.

A myriad of strategies may be employed to address these seemingly disparate health issues. For example, work with community citizens, partner organizations and providers to educate about the prevalence of chronic conditions such as heart diseases, diabetes, cancer, and arthritis, among others, is extremely important. This by itself provides a platform to promote primary prevention through physical activity and healthy eating; implementing simple screening tools in organizations and primary care settings to identify people at risk of diabetes; and incorporate care coordination with specialists to reduce complications such as heart disease. Although implementation may be broad, focused implementation and evaluation must target specific populations or organizations to determine the effect. Health status and health outcomes will not change notably within a three-year period across a community. However, health outcomes such as preventable hospitalizations for short-term complications of diabetes may suggest improved access and care coordination within primary care settings.

Addressing mental health and substance abuse must be a long-term strategy. Many factors, including lack of access, stigmatization and factors contributing to all substance abuse, including prescription, illegal alcohol and tobacco use, require the cooperation of many partner organizations. Using the power of new innovative data platforms like [exploreMOhealth](#) and the [MHA Health Equity dashboards](#) will help Bothwell Regional Health Center and partners identify the prevalence of diseases at the ZIP code level while highlighting the disparities that may need attention. This level of specificity and granularity will help the hospital target interventions with the needed precision. This will also help target the scarce resources where they are needed most, thus taking the necessary steps in promoting health equity. Recognizing the medical and non-medical factors of health as identified by the survey, focus group discussion and secondary data will assist the care teams customize each patient's unique needs.

## **Community Defined**

Bothwell Regional Health Center's primary service area includes Pettis and Benton counties. It also extends into a 40-mile radius that reaches six contiguous counties: Saline, Johnson, Henry, Moniteau, Morgan and Cooper. Specific data was not collected for the secondary market area.

### **Community Characteristics**

Bothwell Regional Health Center serves an area diverse in agriculture and manufacturing industries. Pettis County is home to State Fair Community College, which offers a variety of academic programs including a number of health sciences programs such as dental hygiene, health information technology, medical laboratory technician, nursing, pharmacy technician, respiratory therapy, diagnostic medical sonography, medical assisting, nurse aide, occupational therapy assistant, phlebotomy and behavioral science.

Tourism in Pettis County is driven by the presence of the Missouri State Fair, which hosts about 400,000 visitors during the annual event each August. Additionally, the fairgrounds are the venue for many events throughout the year that attracts visitors from across the region and country. Other fairs and festivals are held throughout the year in the county that foster community and attract visitors. The 240-mile Katy Trail is the country's longest recreational rail trail and bisects Sedalia. The trail attracts people of all ages who enjoy nature, exercise and recreation.

Located on U.S. Highways 50 and 65, Pettis County enjoys the comforts of rural communities with urban life and the Lake of the Ozarks within an hour's drive. It is a community rich in arts and entertainment with the Daum Museum of Contemporary Art located on the State Fair Community College campus and the Liberty Center Association for the Arts located in downtown Sedalia. The Sedalia community boasts a healthy parks system with seven parks, two outdoor aquatic centers, walking trails and a skate park. A new community center opened in March 2022 and features an indoor aquatic facility, community center rooms, convention space, basketball/volleyball/pickleball courts, a fitness area, party rooms, child watch area, an indoor playground, and serves as the home of the Sedalia Senior Center.

A spirit of giving runs deep in Pettis County. Beginning with its foundation, Sedalia has been home to people who know the importance of giving back to the community. Even Bothwell Regional Health Center, which opened in 1930, was the result of an effort by John Homer Bothwell to build a hospital in Sedalia. He pledged \$150,000 in seed money and encouraged the community to also support the project.

The community has strong foundations benefiting education and health care, a United Way organization that allocates more than a half-million dollars to community agencies each year, and Open Door Ministries, which serves as a food pantry and thrift shop and provides financial assistance to low-income families.

Benton County includes the communities of Lincoln, Warsaw and Cole Camp. It offers German heritage, hunting and outdoor activities and lake life. Truman Lake and the Harry S. Truman Dam and Reservoir Visitor Center attract visitors and amenities attract retirees.

Harbor Village - a project of Katy Trail Community Health, the Warsaw Senior Center and Pathways Community Behavioral Health - is a 24,800-square-foot facility in Warsaw that houses multiple health and social services. These services include personal care managers, senior meals, adult care programs, recreational and educational programming for adults, wellness programs, financial and insurance assistance, and an entrepreneurial business center.

### **Other Health Services**

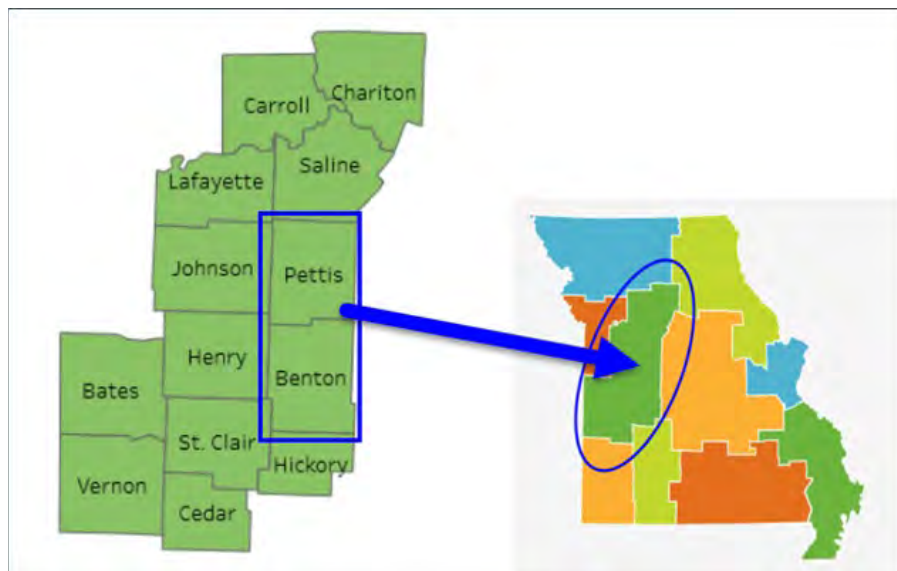

In addition to Bothwell Regional Health Center, Pettis County is served by Katy Trail Community Health, a federally qualified health center, the Pettis County Health Center and several private practice clinics. Bothwell's services include a 108-bed hospital and more than 20 family medicine and specialty clinics. Specialty care available in Sedalia includes behavioral health, cardiology, obstetrics/gynecology, ear/nose/throat, orthopedics, general surgery, neurology, oncology (hematology and radiation), rheumatology, pulmonology, nephrology, pain management, sleep medicine, urology, podiatry and wound. Several privately owned therapy/rehab treatment centers are available as well as a private diagnostic center.

In Benton County, Bothwell has three family medicine clinics. Some specialists visit clinics to provide on-site services. The Benton County-Warsaw area is also served by Katy Trail Community Health, Golden Valley Memorial Healthcare's primary care clinic and the Benton County Health Department. Between January 1 – December 22, 2021, Benton County Health Department administered the following vaccination series: 116 DtaP/TD/Tdap; 4 Hep B; 22 MMR; 20 Polio; and 30 Varicella.

## Occupations by Projected Growth

According to the Missouri Economic Research and Information Center, the primary service areas for Bothwell Regional Health Center are in their west central region, comprised of 13 counties. The two largest cities in this region are Sedalia and Warrensburg. Economic data is gathered to gain insights and provide key information necessary to understand the economic status of the region. This information is in turn used by community members, employers and policy makers to identify gaps, thus helping strategize ways to address them as required for economic stability. The top three industries employing residents in this region are health care, social assistance and manufacturing respectively. The largest government employer is the University of Central Missouri followed by other private employers such as Walmart, Tyson Poultry and ConAgra Foods.

### West Central Region

Source: Missouri Economic Research and Information Center

The table below shows the top ten occupations by projected growth in Missouri's west central region. Combined food preparations and serving workers, cashiers, personal care aides, retail salespersons, waiters and waitresses are the top five occupations with highest total openings in the region.

WEST CENTRAL REGION TOP OPENINGS 2018-2028							
<p>The West Central Region is projected to have almost 11,000 total job openings each year between 2018 and 2028. Total openings comprise growth openings, exit openings, and transfer openings. Growth openings are the result of an occupation growing between the base year and the projected year. Exit openings occur when a worker leaves the workforce entirely, such as retirement. Transfer openings occur when a worker leaves their occupation for a different one.</p> <p>Of the top 20 occupations with the most total openings, three are in the <i>Food Preparation and Serving Related</i> major occupation group. The occupations of <i>General and Operations Managers</i>, <i>Truck Drivers</i> and <i>Secondary School Teachers</i> have large numbers of projected total openings, as well as above average wages for the West Central Region.</p>							
TOP JOB OPENINGS							
Occupation	2018 Estimated Employment	2028 Projected Employment	Annual Exit Openings	Annual Transfer Openings	Annual Growth Openings	Annual Total Openings	Average Annual Wage
Combined Food Preparation and Serving Workers	3,173	3,367	261	322	19	602	\$19,294
Cashiers	2,741	2,687	242	270	-5	507	\$20,437
Personal Care Aides	2,704	3,238	220	195	53	468	\$22,218
Retail Salespersons	2,585	2,555	148	228	-3	373	\$25,676
Waiters and Waitresses	1,526	1,485	104	184	-4	284	\$19,993
Secretaries and Administrative Assistants	2,370	2,120	115	136	-25	226	\$30,893
Janitors and Cleaners	1,537	1,634	97	112	10	219	\$27,589
Nursing Assistants	1,865	1,882	101	109	2	212	\$22,251
Heavy and Tractor-Trailer Truck Drivers	1,487	1,606	64	112	12	188	\$39,550
Cooks, Restaurant	1,070	1,176	60	99	11	170	\$22,568
Laborers and Freight, Stock, and Material Movers	1,175	1,166	53	110	-1	162	\$26,524
Farmworkers and Laborers	853	970	36	113	12	161	\$33,713
Secondary School Teachers	2,001	2,050	56	86	5	147	\$45,457
Construction Laborers	1,085	1,236	39	90	15	144	\$36,344
Welders, Cutters, Solderers, and Brazers	1,222	1,273	32	105	5	142	\$35,266
Office Clerks, General	1,202	1,116	65	74	-9	130	\$28,771
Maintenance and Repair Workers, General	1,355	1,338	47	83	-2	128	\$34,769
Farmworkers, Farm, Ranch, and Aquacultural Animals	757	766	30	94	1	125	\$29,654
Landscaping and Groundskeeping Workers	831	910	36	77	8	121	\$29,155
General and Operations Managers	1,223	1,292	26	83	7	116	\$73,006

Pettis County has a 2.5% unemployment rate compared to 3.7 in Benton County. Both rates have decreased compared to the rates published in the 2019 CHNA report.

Source: Missouri Economic Research and Information Center

## **Primary Research Process**

### **Public Survey**

A survey instrument for quantitative data and multiple focus groups for qualitative data was employed to gather primary data from the market area.

### **Survey Layout and Design**

The Community Health Needs Assessment Survey was a questionnaire-style survey based on a template provided by the Missouri Hospital Association. The 66-question survey contained three sections: (1) health behaviors, (2) medical care and services, and (3) demographics. With one exception, all were multiple-choice questions. One open-ended question, “What health or community services should Bothwell Regional Health Center provide that are currently not available?” was used to identify gaps in services. The demographic section was placed at the end of the survey to head off any barriers respondents may have felt when answering questions about income, age and insurance status.

### **Methodology**

The survey was available online at [brhc.org/survey](http://brhc.org/survey), and paper copies were widely distributed throughout Pettis and Benton counties. The survey period was January 9 through February 9, 2022. To incentivize participation, respondents were entered into a drawing for a \$100 Visa gift card. The goal was to collect enough completed surveys to be statistically significant for the combined population of both counties (approximately 62,000) with a 5% margin of error. This meant at least 382 completed surveys were needed; a total of 348 were received. Paper surveys were entered into the same online survey service used to collect online responses to easily analyze results. The survey was translated into Spanish and Russian and paper copies were provided upon request.

Paper surveys were distributed to the following locations:

- Benton County Health Department
- Bothwell Regional Health Center
- Bothwell Azan Clinic
- Bothwell Cole Camp Clinic
- Bothwell Diagnostic Center
- Bothwell ENT
- Bothwell Lincoln Family Medicine
- Bothwell Family Health
- Bothwell Family Medicine Associates
- Bothwell Health Center — Truman Lake
- Bothwell Internal Medicine Specialists

- Bothwell OB/GYN Associates
- Bothwell Orthopedics and Sports Medicine
- Bothwell Pain Clinic
- Bothwell PEAK Sport and Spine
- Bothwell Sleep Centers
- Bothwell Urology Services
- Bothwell Walk In Clinic
- Bothwell Wound Healing Center
- Katy Trail Community Health
- Pettis County Health Center
- Pettis County Community Partnership
- Sedalia Housing Authority
- Sedalia Senior Center
- Warsaw Senior Center

The following tactics were used to promote awareness and encourage participation in the survey:

- Articles in area newspapers
- Slider image on the Bothwell website home page
- Flyers promoting the \$100 gift card drawing posted at all distribution locations
- Email promoting and sharing the survey link to all Bothwell employees
- Email newsletter from the Sedalia Chambers of Commerce
- Social media promotions, including organic and paid posts

### **Primary Research Data**

	Dimension	2019 CHNA Survey Results	2022 CHNA Survey Results
<b>Gender</b>	Male	11.13%	16.61%

Data Source: Bothwell Regional Health Center CHNA survey results for 2019 and 2022

### **Summary of Key Findings**

Key findings from the CHNA survey results from 2019 and 2022 reveal similarities in the demographics of the people completing the survey in Pettis and Benton counties respectively. Compared to the 2019 results, a slightly higher percent of males completed the survey while a lower percent of females participated in 2022. While both survey periods have a higher White population completion rate at 95%, it aligns well with the secondary data racial breakdown in the region which is approximately 93%. A slightly higher percent of Blacks completed the survey at 3.19% in 2022 compared to 1.46% in 2019.

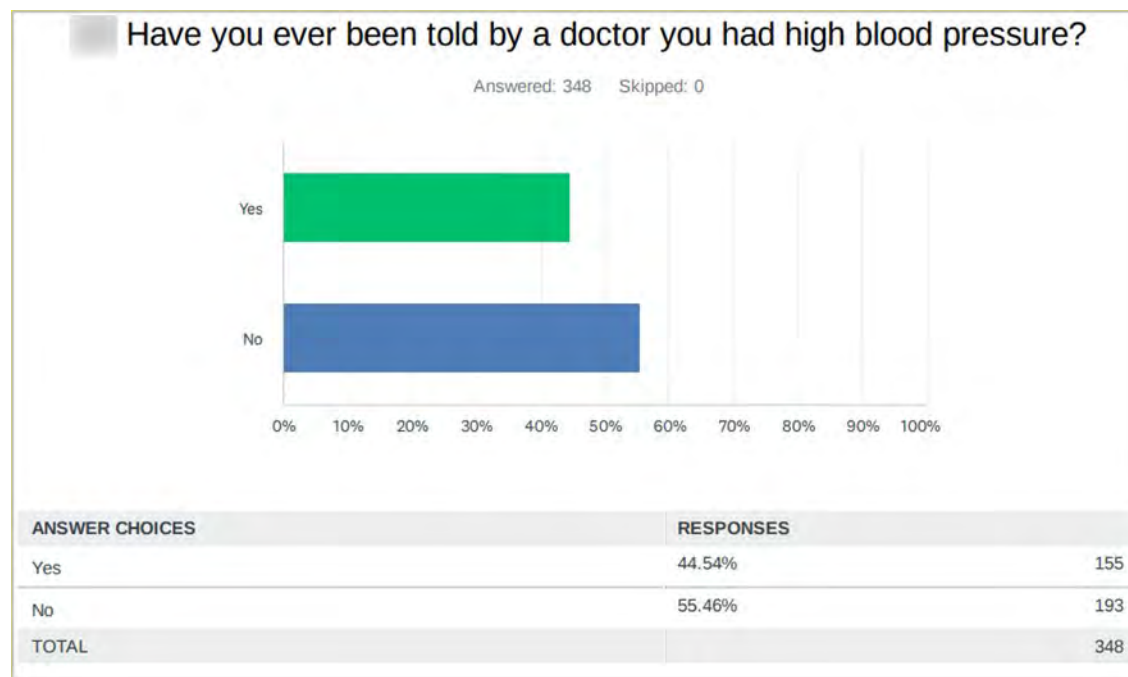

Looking at insurance coverage, there was a higher number of participants who indicated they were covered by Medicare at 25.08% in 2022 compared to 19.96% in 2019. While Medicaid and private insurance coverage were well within range of each other during the two survey periods, there was a notable decline in the survey participants reporting employer coverage at 75.27% in 2019 compared to 64.95% in 2022.

A slightly higher percent of survey takers reported to have graduate level education in 2022 at 14.06% compared to 9.67% in 2019.

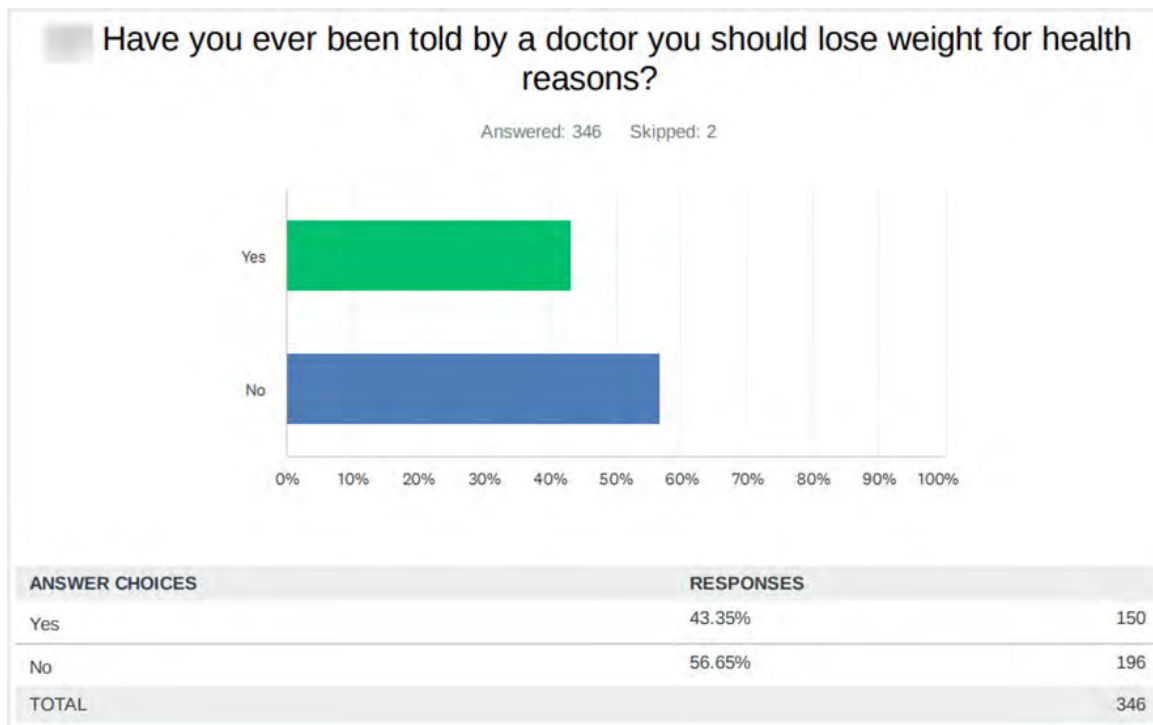

Primary data are an important part of community health needs assessment. These data can fill in gaps in secondary data sources, highlight critical issues or concerns, and provide opportunities for community members to actively engage in the community health assessment process.

Survey results further reveal the top pressing health issues in their community are mental health, access to care, substance use/drug abuse, obesity, cancer, diabetes, heart disease, and lack of dental care. When asked about a preference on health education focus, the top responses were drug and alcohol abuse, diet and exercise, stress management and smoking prevention. Most of these findings coincide with the survey results of the 2016 and 2019 community health needs assessments.

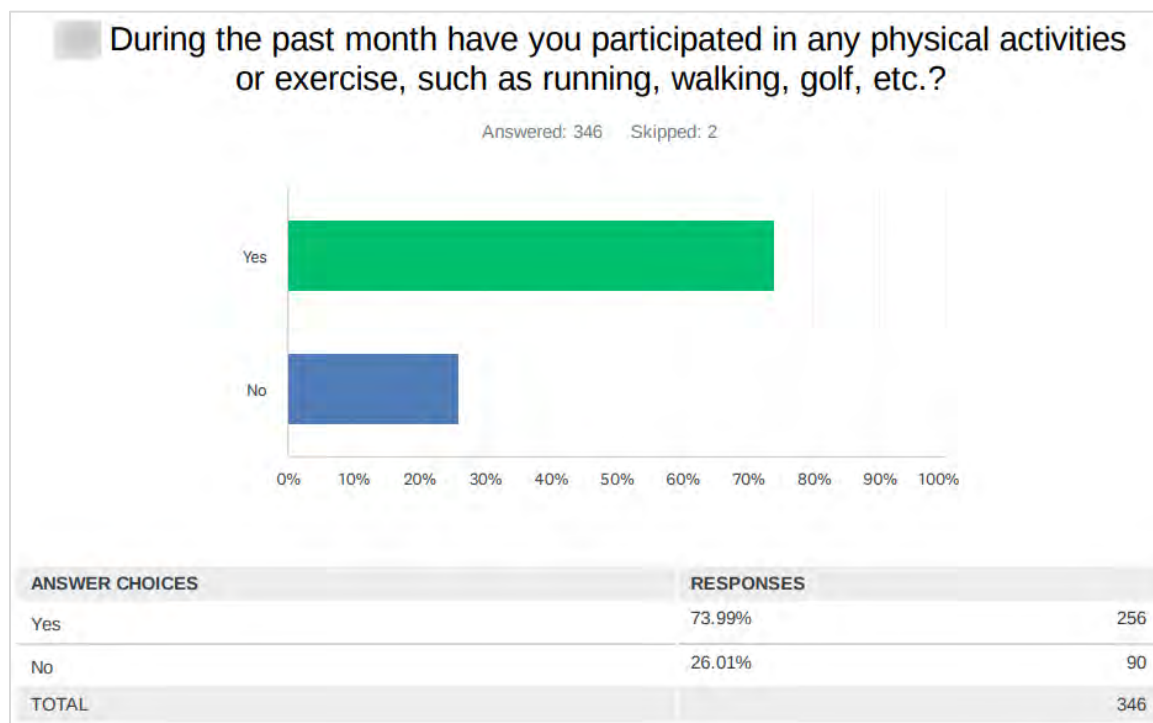

Results from the most recently completed community health assessment survey show about 45% of respondents mentioned being told by a physician they have high blood pressure.

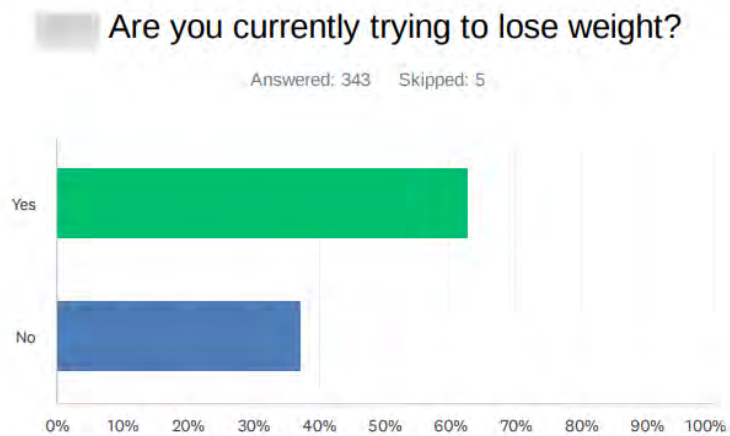

Current community health assessment survey results depict that about 43% of respondents have been told by a physician to lose weight for health reasons.

Of the 346 individuals who completed this CHNA survey question approximately 80% reported they had been engaged in physical activity of some kind.

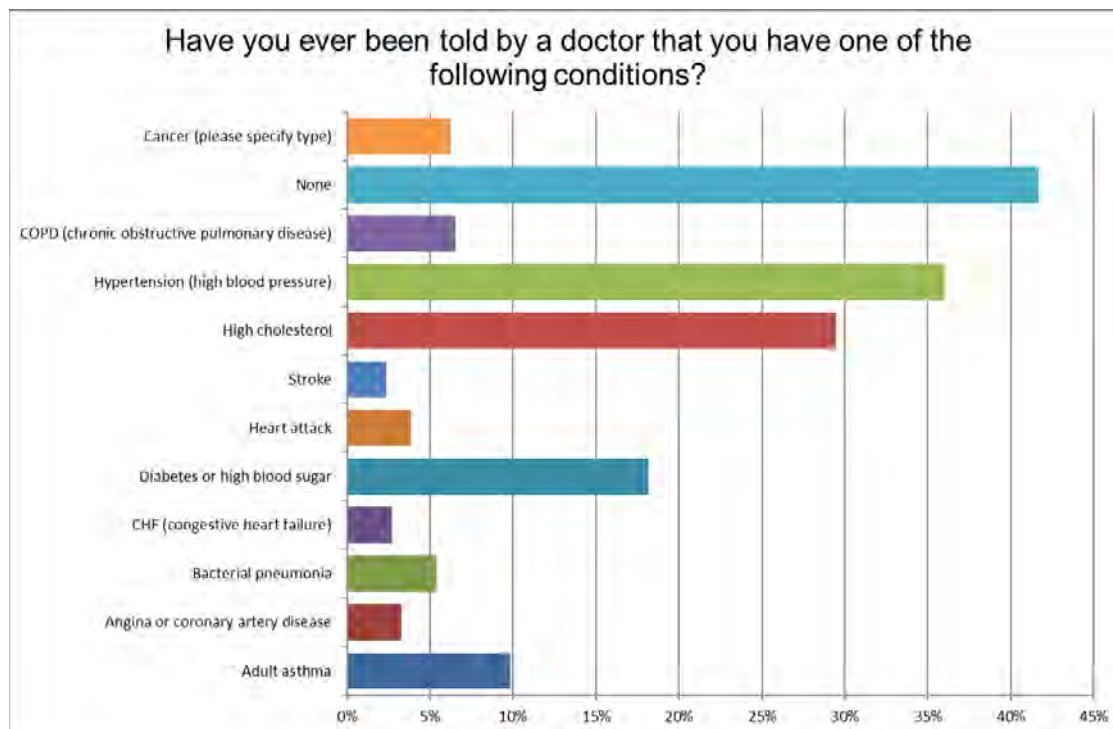

Per the graphic below about 63% of the 343 individuals who responded to the survey question are trying to lose weight.

ANSWER CHOICES	RESPONSES	
Yes	62.68%	215
No	37.32%	128
TOTAL		343

The following graph outlines the top five conditions that survey respondents have been told they have by their doctor, namely, hypertension, high cholesterol, diabetes, adult asthma and COPD.

When asked about how long it has been since they last visited a doctor for their routine checkup about 83% of 330 individuals reported they have seen their doctor within one year and 9% within two years.

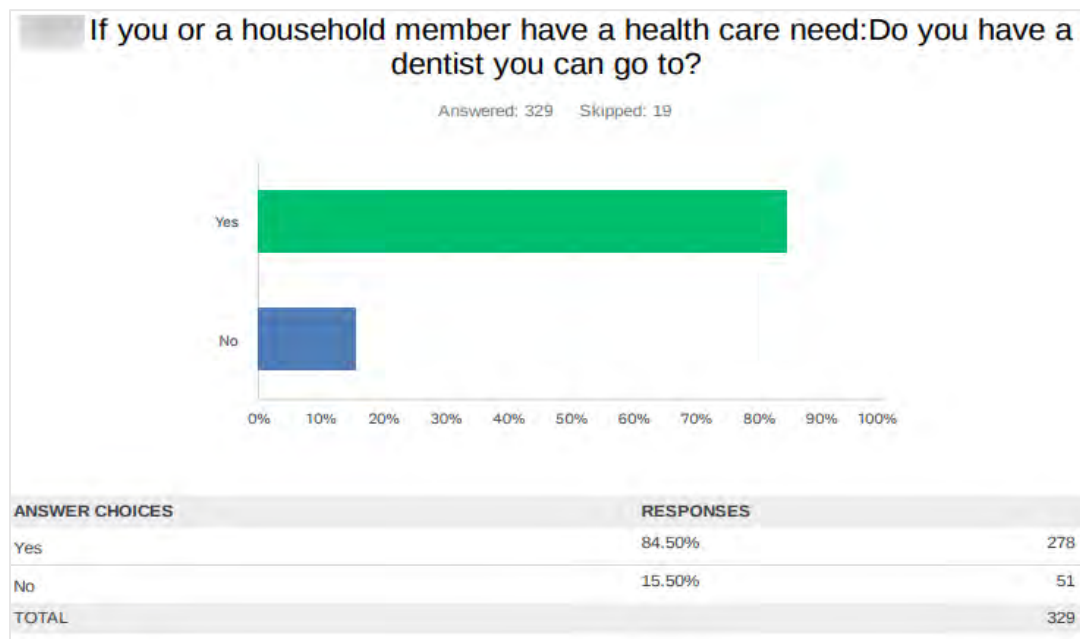

How long has it been since you last visited a doctor for a routine check up? A routine check-up is a general visit, not a visit for a specific injury, illness or condition.

Answered: 330 Skipped: 18

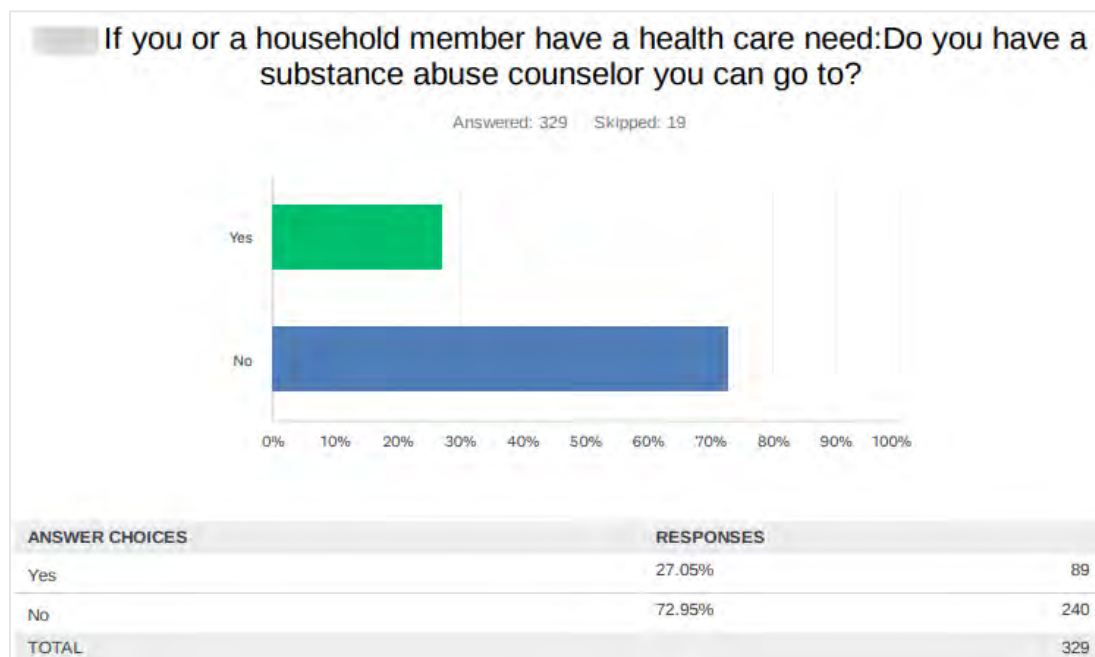

ANSWER CHOICES	RESPONSES	
Within the past year	82.73%	273
Within the past two years	9.09%	30
Within the past five years	3.03%	10
5 or more years ago	4.24%	14
Never	0.91%	3
TOTAL		330

About 85% of survey respondents indicated they have access to a dentist.

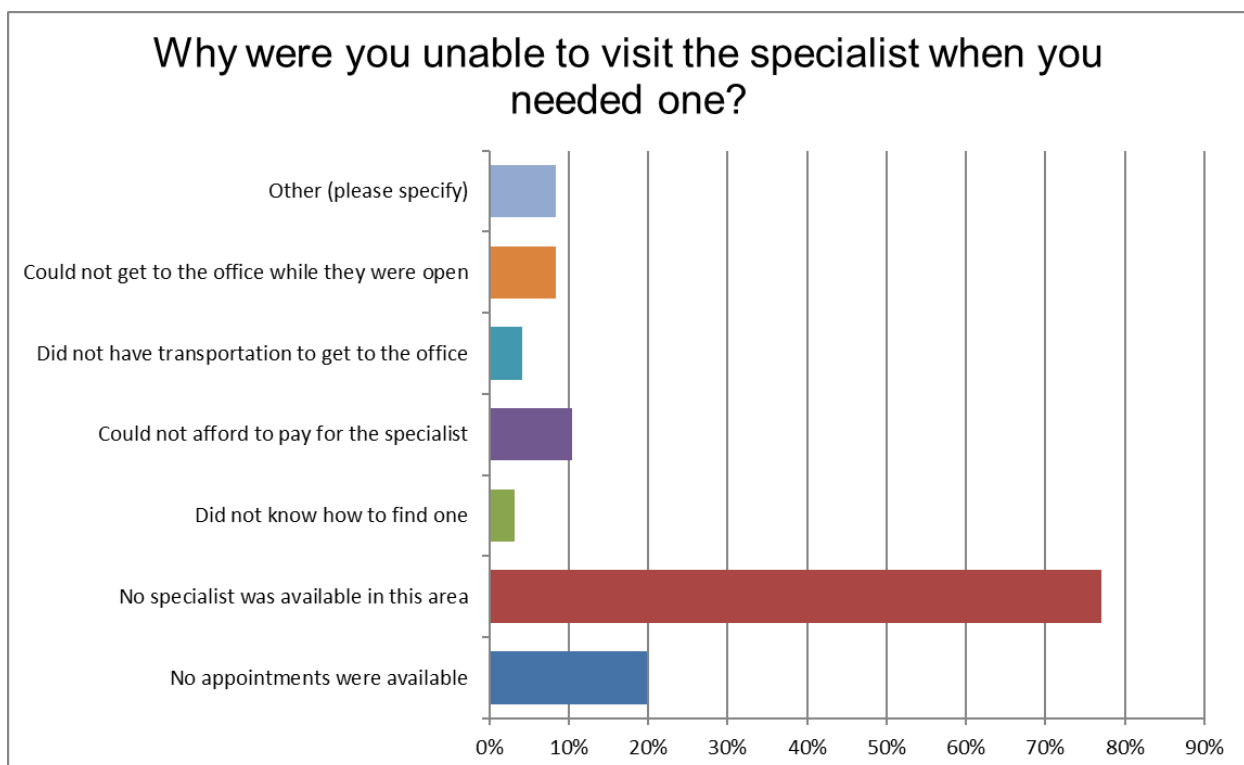

Related to access to a substance abuse counselor, 27% of survey respondents indicated they have access while an overwhelming 73% indicated they do not.

According to the CHNA survey, 29.45% of respondents said someone in their household had difficulty finding a doctor that treats specific illnesses or conditions in the last two years. The table below shows a breakdown of the specialist they were unable to find.

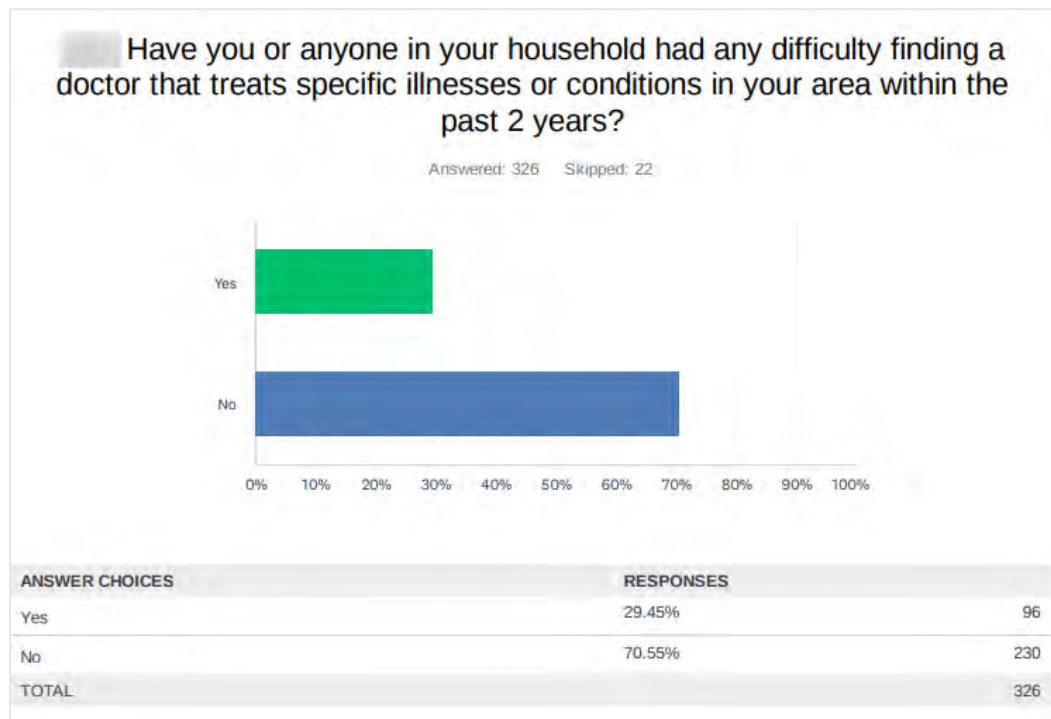

ANSWER CHOICES	RESPONSES	
Bone and joint specialist	5.21%	5
Cancer specialist	7.29%	7
Children's specialist	10.42%	10
Dentist	8.33%	8
Diabetes specialist	12.50%	12
Heart specialist	5.21%	5
Lung and breathing specialist	6.25%	6
Mental health specialist	19.79%	19
Nerve and brain specialist	18.75%	18
Women's health specialist	9.38%	9

The top three reasons why the survey participants were unable to see a specialist when needed were the specialist's availability, lack of appointments and affordability.

Approximately 30% of 326 survey respondents who responded to this question reported difficulty finding a doctor to treat specific illnesses within the past two years.

When asked the most pressing issues within their community, respondents ranked them as follows: drug abuse/illegal substances, ability to pay for care, cost of health care, lack of health insurance, mental health and obesity in adults. These findings were very similar to those of the 2019 CHNA survey. Details are provided on the chart that follows on the next page.

ANSWER CHOICES	RESPONSES	
Ability to pay for care	58.10%	183
Alcohol – dependency or abuse	27.30%	86
Alcohol – underage binge or abuse	9.84%	31
Drug abuse – prescription medications	32.70%	103
Drug abuse – illegal substances	59.05%	186
Cancer	20.00%	63
Child abuse	12.70%	40
Cost of health care	54.92%	173
Domestic violence	15.87%	50
Heart Disease	16.51%	52
Lack of health insurance	51.11%	161
Lack of transportation to health care services	19.05%	60
Lack of dental care	23.17%	73
Lack of physical activity	33.33%	105
Lack of prenatal care	5.71%	18
Mental health	46.03%	145
Obesity in adults	42.86%	135
Obesity in children and teenagers	31.75%	100
Prescription medication too expensive	39.05%	123
Teen pregnancy	5.71%	18
Tobacco use/smoking among adults	22.54%	71
Tobacco use / smoking among teenagers	15.87%	50
Other (please specify)	7.94%	25
Total Respondents: 315		

The top five medical services need in the community per the survey were counseling/mental health services, alcohol and drug abuse treatment, adult primary care services, diabetes care and emergency/trauma care. Please see the chart on the page that follows.

Survey respondents identified the following types of health education services most needed in their community: drug abuse, stress management, diet and exercise, alcohol abuse, and smoking prevention and/or quitting respectively.

ANSWER CHOICES	RESPONSES	
Arthritis	13.65%	43
Alcohol abuse	36.19%	114
Alzheimer's disease	25.08%	79
Asthma	8.89%	28
Cancer screening	24.76%	78
Child abuse/family violence	25.08%	79
Covid-19 vaccines	26.03%	82
Diabetes	25.71%	81
Diet and/or exercise	41.90%	132
Drug abuse	48.89%	154
HIV/AIDS	8.25%	26
Sexually transmitted diseases	20.32%	64
Smoking prevention and/or quitting	27.94%	88
Stress management	46.67%	147
Teen pregnancy	9.52%	30
Other (please specify)	8.25%	26
Total Respondents: 315		

## **2022 Focus Group Summary**

As part of the Community Health Needs Assessment, two focus groups were held (one in Pettis County and one in Benton County) to gather insight on health information and perceptions from a variety of people in each community. Focus groups were carved into small groups in order to facilitate deeper discussion. Participants were asked the same questions that focused on a vision for a healthy community, identifying the biggest health issues, why there are problems, potential strategies for improvement, challenges or barriers to implementing strategies, and Bothwell's role in implementation.

Detailed summaries from each focus group are included below.

### **Pettis County**

Pettis County focus group members were selected to participate based on their organization's role in the community. Health care administration and leadership members represented Bothwell Regional Health Center, Katy Trail Community Health and Pettis County Health Center. In addition to health care representatives, the group included participants from city and community partners including the City of Sedalia, Pettis County, State Fair Community College, and area nursing homes.

Members first had the opportunity to imagine their vision for a healthy community that included wide access to services that promote a healthy lifestyle such as safe drinking water, a sense of safety, affordable and decent housing, adequate public transportation, diverse industry and workforce, strong educational system, sidewalks, active parks system and accessible greenspace, exercise facilities, and a strong primary care system. The Heckart Community in Sedalia opened since the last CHNA, which all participants agreed is a major step toward promoting a healthy lifestyle and could serve as a nucleus for additional health initiatives.

Many specific health issues were identified as the biggest challenges in the community including substance abuse, mental health issues, obesity, heart disease, suicide (especially youth), and accessible dental care. Participants believed many of these issues can be tied to social issues such as generational poverty, lack of education and awareness, lack of healthy options and support resources or knowledge on how to utilize them, lack of focus on healthy social norms, and concerns about the strength of partnerships with local schools.

Implementation strategies discussed to combat the identified issues included having free places to exercise, free educational health classes, better connecting people to additional resources, helping people overcome the stigma of asking for help, mentoring programs, life skills training, and partnering with public health and schools to intervene earlier to stunt or stop the cycle of poor health choices.

Barriers to implementation include a “hands-off” parenting style that appears more prevalent, continuous cycles of family trauma, silos between programs and organizations, late intervention from schools, lack of understanding of obesity and health, language barriers among minority populations, literacy differences, funding limitations, overcoming community inertia, and a downturn in the number of people interested in health care careers.

Participants see Bothwell as a credible and authoritative leader that is well-positioned to serve as a community hub. Bothwell should leverage this position to pull together diverse groups and create partnerships among other organizations that impact health, e.g., public health, secondary and post-secondary education, industry, and community organizations that create a greater sense of interconnectedness in the community.

### **Benton County**

Benton County focus group members were individuals from local government, businesses and the community that includes the cities of Warsaw, Cole Camp and Lincoln. Health care administration and leadership members represented Bothwell Regional Health Center and the Benton County Health Department. Participants answered the same questions as the Pettis County group in the same small-group format.

This group’s vision for a healthy community included available health care for the entire community, robust education options, social and recreational opportunities both indoors and outdoors, presenting healthy choices, education and options to children at an early age, and residents who are socially connected to churches and schools.

Many community health issues were identified including an aging population, food insecurity, teen pregnancy, substance abuse, obesity, mental health issues and heart problems. Members believe many of the issues are problems because of a lack of education and transportation, easy access to drugs, poor behavior or life choices, misinformation, fear or lack of trust in the system and lack of money.

Implementation strategies discussed to combat the identified issues included working with schools and public health to create an early intervention cycle of education, understanding and trust, starting more conversations through organized focus groups that would surface and normalize challenges, creating a mentor program to connect generations, establishing a nursing 411 phone line for rural areas, creating a transportation coalition, offering more community education, and evening and/or weekend access to health care.

Social issues that are barriers to improvements include dependence on government assistance, social media use as a distraction, an alarming lack of work ethic among some young people, a higher proportion of low-income residents, and a lack of adequate support networks. Process challenges mentioned included Bothwell’s current use of a centralized scheduling system.

Participants see Bothwell's role as a facilitator to create better communication, involvement and education by collaborating with others in the community to develop educational programs in the schools and in communities. Several participants mentioned they do not know the Bothwell clinicians in their communities or what services are offered so there is the opportunity for greater awareness in this county.

### Focus Group Participants

Name	Position	Organization
Steve Davis	Chief Financial Officer	Bothwell Regional Health Center
David Dick	Presiding Commissioner	Pettis County
Dr. Phil Fracica	Chief Medical Officer	Bothwell Regional Health Center
Dee Dee Gilmore	Nurse Practitioner	Bothwell Regional Health Center
Lisa Irwin	Executive Director of Human Resources	Bothwell Regional Health Center
Rob Rollings	Owner	Rollings Architects
Bev Rollings	Owner	Rollings Architects
Stafford Swearingen		Business Owner and Bothwell Board Chair
Ron Toellner	Community Member	
Lori Wightman	Chief Executive Officer	Bothwell Regional Health Center
Jeff Wimann	Community Member	
Dr. Paul Bassett	Physician	Sedalia VA Clinic and Bothwell Board Member
Allison Brosch	ADN Program Coordinator	State Fair Community College
Tom Oldham	Council Member	City of Sedalia
Dianne Simon	Compliance Officer	Sylvia G. Thompson Residence Center, Inc.
Mary Holloman	Human Resources Manager	Bothwell Regional Health Center
Sarah Arnett	Digital Strategist	Callis
Dana Kelchner	Account Supervisor	Callis
Mary Nell Strautman	Board Chair	Katy Trail Community Health
Bryan Jenkins	Owner	State Farm Insurance
Chris Stewart	Executive Director	Katy Trail Community Health
Keith Morrow	Vice President of Clinic Operations	Bothwell Regional Health Center
Janeice Dodick	CEO Executive Assistant	Bothwell Regional Health Center
Deidre Esquivel	Board Member	Bothwell Regional Health Center
Joyce Foster	Board Member	Bothwell Regional Health Center
Billy Foster	Pastor	Bethel Family Church
Jim Marcum	Western Commissioner	Pettis County
Malinda Nevels		Pettis County Health Center

Name	Position	Organization
Stephanie Eaton	Owner	The Hometown Inn
Maggie Schaffer	Director of Case Management	Bothwell Regional Health Center
Christina Borgmeyer	Community Member	
Chuck Allcorn		Hawthorn Bank
Cassie Hoke	Community Member	
Kim Horstman	Community Member	
Marsha Mehrens	Community Member	
Leslie Harris	Director of Clinic Operations	Bothwell Regional Health Center
Ragin Boise	Director of Clinic Operations	Bothwell Regional Health Center
Kelvin Shaw	City Administrator	City of Sedalia
James Mahlon White	Owner	Benton County Enterprise
Gary Noland	Community Member	
Debbie Noland	Community Member	
Michele Laas	CNO	Bothwell Regional Health Center
Kelli Daleski		Benton County Health Department
Linda Viebrock		Benton County Health Department
Tammie Heimsoth		Benton County Health Department
Debbie Joy		Benton County Health Department
Adam Howe	Alderman	City of Warsaw
Celia Roasch		Benton County Health Department
Bob Smith	Community Member	
Nola Smith	Community Member	
Eddie Simons	Mayor	City of Warsaw

Representatives from the following organizations were invited but unable to attend:

- AFC Urgent Care
- Benton County Commission
- Benton County Sheriff's Office
- Burrell Behavioral Health
- Compass Health
- City of Sedalia Mayor's Office
- Pettis County Sheriff's Office
- Pettis County Administrator's Office
- Pettis County Ambulance District
- Pettis County Community Partnership
- Sedalia 200 School District
- Sedalia Police Department
- Warsaw, Cole Camp and Lincoln Schools

### **Opportunities**

As demonstrated by the county health rankings, roadmaps and data sources, the following areas are potential opportunities for community health improvement in Benton and Pettis counties. County rates have been compared to the state rates.

### **Health Outcomes**

- Higher premature death – Benton County only
- Poor or fair health days
- Poor mental health days
- Diabetes prevalence
- Premature age-adjusted mortality – Benton County only

### **Health Behaviors**

- Higher percent of adult smoking
- Higher percent of adult obesity
- Higher percent of physical inactivity
- Higher percent of people without access to exercise opportunities
- Higher percent of alcohol-impaired driving deaths – Benton County only
- Higher number of teen births
- Higher percent of people reporting food insecurity
- Higher number of motor vehicle crash deaths

## **Clinical Care**

- Higher percent of uninsured
- Higher ratio of primary care physicians to patient
- Higher ratio of dentists to patient – Benton County only
- Higher ratio of mental health providers to patient
- Higher preventable hospital stays

## **Social and Economic Factors**

- Lower percent of high school completion
- Lower percent of people reporting completion of some college
- Higher unemployment
- Higher percent of children in poverty
- Higher number of injury deaths

## **Physical Environment**

- Severe housing problems – Benton County only
- Lower percent of people reporting broadband access

## **Strengths**

The following community health strengths in Benton and Pettis counties have been identified based on the data sources; rates have been compared to the state.

- Lower rate of premature death – Pettis County only
- Lower percent of kids born with low birthweight
- Lower percent of excessive drinking
- Lower sexually transmitted infections
- Lower violent crimes
- Higher high school graduation rates
- Lower residential segregation among non-White/White
- Lower homicides
- Lower suicides – Pettis County only
- Lower firearms fatalities – Pettis County only
- Lower air pollution – particulate matter

## **Secondary Research Process**

Secondary data derived from various local, state and national data sources was reviewed and analyzed. Findings were key in helping identify the gaps needing attention in Pettis and Benton counties respectively. Results from the previous community health assessments completed in 2016 and 2019 were used as a basis for the 2022 CHNA process. As required of the process, multiple data sources were used in the secondary data analysis process. Data from the primary service areas was benchmarked against state and national data whenever possible to identify emerging trends. It is important to note that data from the [exploreMOhealth](#) health atlas was used since it provides a comprehensive and customized community health needs assessment that evaluates health factors and health outcomes across counties and ZIP codes in the primary service areas. Findings from these results will be the basis for any decision-making and will ensure that resources will be allocated where they are needed most.

The following secondary data sources were used in the analysis:

- Bureau of Labor Statistics and the Division of Occupational Employment Centers for Disease Control and Prevention, Behavioral Risk Factor Surveillance System
- Centers for Disease Control and Prevention, National Vital Statistics
- Federal Bureau of Investigation, FBI Uniform Crime Reports
- Feeding America
- Missouri Department of Elementary and Secondary Education
- Missouri Department of Health and Senior Services, Missouri County-Level Study
- Missouri Department of Mental Health
- Missouri Department of Social Services
- Missouri Division of Behavioral Health, Substance Abuse and Mental Health Services Administration
- Missouri Economic Research and Information Center
- National Archive of Criminal Justice Data
- National Center for Education Statistics, NCES - Common Core of Data
- Pennsylvania State University, College of Agricultural Sciences, Northeast Regional Center for Rural Development
- University of Missouri, Center for Applied Research and Environmental Systems
- University of Wisconsin's Robert Wood Johnson Foundation County Health Rankings
- US Census Bureau, American Community Survey
- US Census Bureau, Decennial Census
- US Census Bureau, Small Area Health Insurance Estimates
- US Census Bureau, Small Area Income and Poverty Estimates
- US Department of Education, ED Facts
- US Department of Health and Human Services, Administration for Children and Families
- US Department of Health and Human Services, Health Indicators Warehouse
- US Department of Labor, Bureau of Labor Statistics

## **Secondary Research Data**

Secondary data findings revealed Pettis County has over twice the total population compared to Benton County. Both counties have a significantly lower percent of Blacks and Asians compared to state and national trends. When it comes to racial composition, Pettis County is more diverse compared to Benton County. Compared to the state and nation, both counties have significantly higher non-Hispanic White population. Between 2000 and 2010 the population in the two counties experienced an 8.26% increase. A review of population median age based on the latest five-year American Community Survey estimate shows that Benton has a significantly higher median age at 53.6 years compared to 37.8 years for Pettis County. On the same note, the state and national median age is 38.6 and 38.1 years, which is significantly lower than that of Benton County. Demographics information further reveals a significant part of Benton County is considered rural compared to Pettis County. With a total population of 61,257 between both counties, 28,823, or 47.05% of the population, is classified urban while 32,434, or 52.95%, is rural. These two counties have a higher rural population compared to the state and nation.

A careful review of the social and economic factors of population with no high school diploma shows that Benton County has a slightly higher percent population age 25 and above with no high school diploma compared to Pettis County. It is worth noting this is a change from the previously completed CHNA which showed Pettis County with a higher percent of the population in this category. Between both counties, 16.26% of the population aged 25 and older have obtained a bachelor's level degree or higher. Unfortunately, this is significantly lower than the state and national rates of 29.22% and 32.15% respectively. This indicator is important because studies have shown people with more education live longer, healthier lives than those with fewer years of schooling. Education is important not only for higher paying jobs and economic productivity, but also for saving lives and cost savings.

The per capita income, which constitutes all reported income from wages and salaries as well as income from self-employment, interest or dividends, public assistance, retirement, and other sources, was higher in Benton County compared to Pettis County. The state and national per capita income was higher than that of these two counties. Further analysis revealed that Black or African Americans in Benton County had a higher per capita income compared to their White counterparts. Blacks or African Americans in Pettis County had a significantly lower per capita income compared to Whites. The median family income based on the latest five-year American Community Survey estimates for the two counties was lower than that of the state and nation. Both Benton and Pettis County have 16.80% of individuals living in households with income below the 100% Federal Poverty Level (FPL). This indicator is especially important because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status. The FPL for both counties is higher than the state and national rates of 13.68% and 13.42% respectively.

A review of the percentage of the population with insurance enrolled in Medicaid or other means-tested public health insurance in both counties reveals a higher rate in Pettis County.

This measure assesses vulnerable populations which are more likely to have multiple health access, health status and social support needs. When combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment. This metric is especially important because of the associated health disparities that result from gaps in accessibility. Both Pettis and Benton counties reported combined average is 12.51% of households receive Supplemental Nutrition Assistance Program (SNAP) benefit; this is higher than the state and national trends. When it comes to food insecurity, Benton County had a slightly higher rate than Pettis County. This metric is an estimate of percentage of the population that did not have food at some point during the report year and one of the most common social determinants of health. Compared to the state and nation, both counties had significantly higher teen births per 1,000 population.

According to the Centers for Disease Control and Prevention, Behavioral Risk Factor Survey System, Pettis had a higher age-adjusted percent of adults aged 18 and older who self-reported lacking social and emotional support compared to Benton County. The social and emotional support metric is important because it demonstrates how they can navigate the challenges of daily life to ensure good mental health. It is also linked to educational achievement and economic stability. Benton County had a rate of 14.20% compared to Pettis County at 21.30%.

A review of Missouri Department of Health and Senior Services County Health Rankings data reveals that a higher percent of respondents reported their health was in fair or poor status in Pettis County compared to Benton County. Residents in both counties reported the same average of poor mental health days per month. Compared to Benton County, Pettis County has a slightly higher percent of adults reporting 14 or more days of poor physical health per month. Benton County has a slightly higher percent of adults reporting 14 or more days of poor mental health per month compared to Pettis County. When comparing diagnosis of diabetes, Pettis County had a higher percentage of adults aged 20 and above than Benton County. Related to diagnosis of human immunodeficiency virus (HIV), Benton County has a significantly higher number of people aged 13 years and older living with HIV infection per 100,000 population.

Both Benton and Pettis counties have continued to see an increase in smoking and hypertension diagnoses from 2017 to 2021. Reviewing the strategies, actions and activities implemented during the reporting period and continuously monitoring their effectiveness will help identify opportunities for improvement. Using the power of the readily available sub-county level data, technology, leveraging partnerships, implementing evidence-based programs, and reviewing the current processes and systems will assist Bothwell Regional Health Center in their implementation journey.

Based on inpatient/outpatient and emergency department diagnosis data, there was an 8% increase in the smoking diagnosis during this time period; see the graph that follows. During the same reporting period, there was a 22% increase in hypertension in Benton County.

Source: Claims Data – Inpatient/Outpatient and Emergency Department Diagnosis Data

Using this same data, Pettis County experienced a 6% increase in the smoking diagnosis and a 39% increase in hypertension diagnosis.

Source: Claims Data – Inpatient/Outpatient and Emergency Department Diagnosis Data

The results of this secondary data analysis show Pettis and Benton counties have similar issues warranting a collaborative, well-coordinated, multifaceted approach to address the common problems together. Despite the significant differences on total population, the counties have more in common in health outcomes, factors, behaviors, social and economic factors among other categories included in this report. Sharing these results with the two primary service areas and looking for areas of collaboration will help address the underlying problems required to ensure healthy communities. Reviewing the secondary data closely and capturing the missing elements in the primary data collection process will assist Bothwell Regional Health Center and the community at large identify opportunities and current gaps to be addressed. Identifying the key partners that should be engaged earlier in the process will be critical in ensuring a successful prioritization and implementation of the CHNA.

The following data from the [exploreMOhealth](#) database was used to aggregate secondary data analysis to identify which health outcomes and health factors are most important in Pettis and Benton counties. It was extremely important in helping to generate this customized Community Health Needs Assessment using county- and ZIP-level data on demographics, socioeconomic status, risk factors, preventive practices, health conditions and environment. With the changing landscape in health care, new population health strategies are refocusing how care is delivered. However, to understand why poor emotional or physical health occurs in some communities, health care providers should be looking upstream to the numerous factors that lead to positive or negative health outcomes. These factors include social, environmental and contextual determinants. These are community factors that create an intersection of traditional health care and public health. Integrating social determinants in care delivery will ensure that the entire care team is using a holistic approach that considers both medical and non-medical factors of health. Using the power of data available through platforms like [exploreMOhealth](#) and MHA's [Health Equity dashboards](#) will help magnify and stratify data, thus assisting Bothwell Regional Health Center implement strategies and actions with the needed precision.

# Demographics

## Total Population

A total of 61,462 people live in the 1,386.27 square mile report area defined for this assessment according to the U.S. Census Bureau American Community Survey 2015-19 5-year estimates. The population density for this area, estimated at 44.34 persons per square mile, is less than the national average population density of 91.93 persons per square mile.

Report Area	Total Population	Total Land Area (Square Miles)	Population Density (Per Square Mile)
Report Location	61,462	1,386.27	44.34
Benton County, MO	19,107	704.04	27.14
Pettis County, MO	42,355	682.22	62.08
Missouri	6,104,910	68,746.51	88.80
United States	324,697,795	3,532,068.58	91.93

United States	60.70%	12.31%	5.45%	0.67%	0.17%	0.24%	2.45%	18.01%

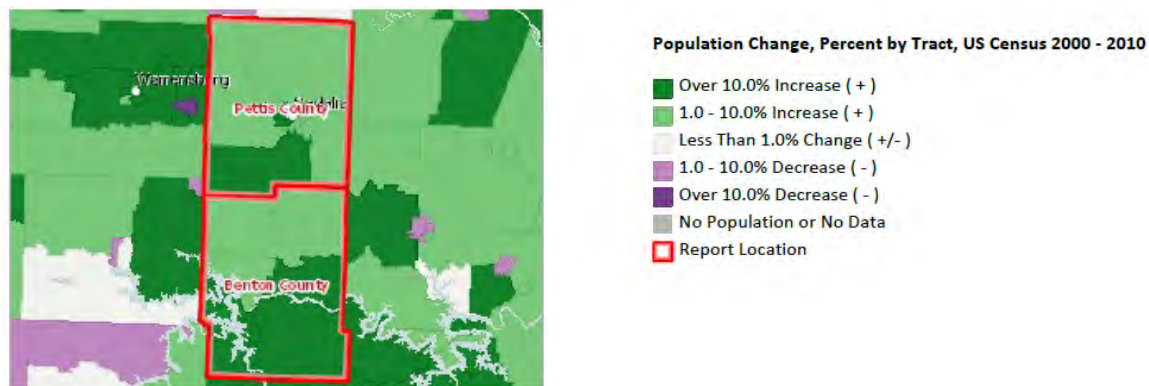

## Change in Total Population

According to the United States Census Bureau Decennial Census, between 2000 and 2010 the population in the report area grew by 4,674 persons, a change of 8.26%. A significant positive or negative shift in total population over time impacts healthcare providers and the utilization of community resources.

Report Area	Total Population, 2000 Census	Total Population, 2010 Census	Population Change, 2000-2010	Population Change, 2000-2010, Percent
Report Location	56,583	61,257	4,674	8.26%
Benton County, MO	17,180	19,056	1,876	10.92%

## Families with Children

According to the most recent American Community Survey estimates, 27.40% of all occupied households in the report area are family households with one or more child(ren) under the age of 18. As defined by the US Census Bureau, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption. A non-family household is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

Report Area	Total Households	Total Family Households	Families with Children (Under Age 18)	Families with Children (Under Age 18), Percent of Total Households
Report Location	23,905	15,580	6,549	27.40%

## Population Under Age 18 by Ethnicity Alone

This indicator reports the percentage of population who are under age 18 by ethnicity alone during 2015-2019, according to the American Community Survey (ACS). Within the report area, there were 1,644 Hispanics under age 18, representing 40.48% of the total Hispanic population. There were 12,210 Non-Hispanics under age 18 in the report area, representing 21.27% of the total Non-Hispanic population. Data for this indicator is only reported for individuals where age, race, and ethnicity were identified in the American Community Survey.

Report Area	Hispanic or Latino	Not Hispanic or Latino	Hispanic or Latino, Percent	Not Hispanic or Latino, Percent
Report Location	1,644	12,210	40.48%	21.27%
Benton County, MO	129	3,201	32.99%	17.10%

## Population Age 18-24

Of the estimated 61,462 total population in the report area, an estimated 4,642 persons are between the ages of 18 and 24, representing 7.55% of the population. These data are based on the latest U.S. Census Bureau American Community Survey 5-year estimates. The number of young adults in the report area is relevant because this population has unique needs which should be considered separately from other age groups.

Report Area	Total Population	Population Age 18-24	Percent Population Age 18-24

## Population with Any Disability

This indicator reports the percentage of the total civilian non-institutionalized population with a disability. The report area has a total population of 60,650 for whom disability status has been determined, of which 11,919 or 19.65% have any disability. This indicator is relevant because disabled individuals comprise a vulnerable population that requires targeted services and outreach by providers.

Report Area	Total Population (For Whom Disability Status Is Determined)	Population with a Disability	Population with a Disability, Percent
Report Location	60,650	11,919	19.65%
Benton County, MO	18,902	4,906	25.95%
Pettis County, MO	41,748	7,013	16.80%
Missouri	5,990,637	872,438	14.56%
United States	319,706,872	40,335,099	12.62%

Note: This indicator is compared to the state average.

## Population in Limited English Households

This indicator reports the percentage of the population aged 5 years and older living in Limited English speaking households. A limited English speaking household is one in which **no** household member 14 years old and over speaks only English at home, or no household member speaks a language other than English at home and speaks English “very well”. In the report area, 679 individuals, or 1.18% live in limited English households. This indicator is significant as it identifies households and populations that may need English-language assistance.

Report Area	Total Population Age 5+	Linguistically Isolated Population	Linguistically Isolated Population, Percent
Report Location	57,722	679	<b>1.18%</b>
Benton County, MO	18,280	107	0.59%
Pettis County, MO	39,442	572	1.45%
Missouri	5,733,340	64,400	1.12%
United States	304,930,125	12,982,993	4.26%

Linguistically Isolated Population, Percent

Population in Linguistically Isolated Households, Percent by Tract, ACS 2015-19

## Population with Limited English Proficiency

This indicator reports the percentage of the population aged 5 and older who speak a language other than English at home and speak English less than "very well". This indicator is relevant because an inability to speak English well creates barriers to healthcare access, provider communications, and health literacy/education. Of the 57,722 total population aged 5 and older in the report area, 1,967 or 3.41% have limited English proficiency.

Report Area	Population Age 5+	Population Age 5+ with Limited English Proficiency	Population Age 5+ with Limited English Proficiency, Percent
Report Location	57,722	1,967	3.41%
Benton County, MO	18,280	163	0.89%
Pettis County, MO	39,442	1,804	4.57%
Missouri	5,733,340	126,914	2.21%
United States	304,930,125	25,615,365	8.40%

Population Age 5+ with Limited English Proficiency, Percent

## Population Geographic Mobility

This indicator reports information about population in-migration by assessing changes in residence within a one year period. Of the 60,910 persons residing in the report area, an estimated 6.52% relocated to the area, according to the latest American Community Survey 5-year estimates. Persons who moved to a new household from outside of their current county of residence, from outside their state of residence, or from abroad are considered part of the in-migrated population. Persons who moved to a new household from a different household within their current county of residence are not included.

Report Area	Total Population	Population In-Migration	Percent Population In-Migration
Report Location	60,910	3,969	6.52%

## Foreign-Born Population

This indicator reports the percentage of the population that is foreign-born. The foreign-born population includes anyone who was not a U.S. citizen or a U.S. national at birth. This includes any non-citizens, as well as persons born outside of the U.S. who have become naturalized citizens. The native U.S. population includes any person born in the United States, Puerto Rico, a U.S. Island Area (such as Guam), or abroad of American (U.S. citizen) parent or parents. The latest figures from the U.S. Census Bureau show that 3,117 persons in the report area are of foreign birth, which represents 5.07% of the report area population. This percentage is less than the national average of 13.55%.

Report Area	Total Population	Naturalized U.S. Citizens	Population Without U.S. Citizenship	Total Foreign-Birth Population	Foreign-Birth Population, Percent of Total Population

## Hispanic Population

The estimated population that is of Hispanic, Latino, or Spanish origin in the report area is 4,061. This represents 6.61% of the total report area population, which is less than the national rate of 18.01%. Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. People who identify their origin as Hispanic, Latino, or Spanish may be of any race.

## Urban and Rural Population

This indicator reports the percentage of population living in urban and rural areas. Urban areas are identified using population density, count, and size thresholds. Urban areas also include territory with a high degree of impervious surface (development). Rural areas are all areas that are not urban. Of the report areas 61,257 population, 28,823 or 47.05% of the population is classified urban while 32,434 or 52.95% is rural.

Report Area	Total Population	Urban Population	Rural Population	Urban Population, Percent	Rural Population, Percent

## Rural Population, Percent by Race Alone

This indicator reports the percentage of rural population in the report area by race alone.

Report Area	White	Black or African American	Native American or Alaska Native	Asian	Native Hawaiian or Pacific Islander	Some Other Race	Multiple Race
Report Location	55.11%	11.35%	44.90%	36.48%	22.22%	28.25%	40.30%
Benton County, MO	86.62%	63.79%	80.34%	83.33%	60.00%	79.66%	91.37%
Pettis County, MO	39.70%	8.94%	21.47%	26.48%	16.13%	26.45%	26.60%
Missouri	34.22%	2.69%	36.78%	7.03%	18.81%	13.82%	20.75%
United States	23.17%	8.97%	35.33%	2.72%	7.53%	6.41%	11.04%

## Veteran Population

This indicator reports the percentage of the population age 18 and older that served (even for a short time), but is not currently serving, on active duty in the U.S. Army, Navy, Air Force, Marine Corps, or the Coast Guard, or that served in the U.S. Merchant Marine during World War II. Of the 47,492 population of the report area, 4,960 or 10.44% are veterans.

Report Area	Total Population Age 18+	Total Veterans	Veterans, Percent of Total Population
Report Location	47,492	4,960	10.44%
Benton County, MO	15,777	1,966	12.46%
Pettis County, MO	31,715	2,994	9.44%
Missouri	4,704,624	401,779	8.54%

Missouri	370,808	30,971	16.31%	1.27%
United States	16,611,283	1,619,039	13.68%	1.26%

## Veteran Population by Age Group, Total

This indicator reports the total veteran population in the report area by age group.

Report Area	Age 18-34	Age 35-54	Age 55-64	Age 65-74	Age 75+
Report Location	137	1,011	1,039	1,543	1,230
Benton County, MO	8	308	471	671	508
Pettis County, MO	129	703	568	872	722
Missouri	32,024	88,286	75,272	113,316	92,881
United States	1,609,388	4,281,826	3,251,828	4,811,798	4,275,482

## Veteran Population by Age Group, Percent

This indicator reports the percentage of veterans in the report area by age group.

Report Area	Age 18-34	Age 35-54	Age 55-64	Age 65-74	Age 75+
Report Location	1.18%	7.14%	11.57%	21.19%	22.56%
Benton County, MO	0.31%	7.59%	14.00%	19.57%	21.48%
Pettis County, MO	1.43%	6.96%	10.11%	22.62%	23.38%
Missouri	2.33%	5.87%	9.16%	19.61%	21.65%
United States	2.15%	5.17%	7.79%	16.29%	20.13%

## Other Social and Economic Factors

### Population with No High School Diploma

Within the report area there are 6,109 persons aged 25 and older without a high school diploma (or equivalency) or higher. This represents 14.22% of the total population aged 25 and older. This indicator is relevant because educational attainment is linked to positive health outcomes (Freudenberg & Ruglis, 2007).

Report Area	Total Population Age 25+	Population Age 25+ with No High School Diploma	Population Age 25+ with No High School Diploma, Percent
Report Location	42,966	6,109	14.22%
Benton County, MO	14,783	2,293	15.51%

## Student Reading Proficiency (4th Grade)

Information about student performance in the 4th grade English Language Arts portion of the state-specific standardized tests are displayed in the table below. Of 2,830 students tested, 48.2% of 4th graders performed at or above the "proficient" level, and 51.8% tested below the "proficient" level, according to the latest data. Students in the report area tested better than the statewide rate of 46.1%.

Report Area	Students with Valid Test Scores	Students Scoring 'Proficient' or Better, Percent	Students Scoring 'Not Proficient' or Worse, Percent
Report Location	2,830	48.2%	51.8%
Benton County, MO	672	37.5%	62.5%
Pettis County, MO	2,158	51.5%	48.5%

## Head Start

Head Start is a program designed to help children from birth to age five who come from families at or below poverty level. The program's goal is to help children become ready for kindergarten while also providing the needed requirements to thrive, including health care and food support.

This indicator reports the number and rate of Head Start program facilities per 10,000 children under age 5. Head Start facility data is acquired from the US Department of Health and Human Services (HHS) 2020 Head Start locator. Population data is from the 2010 US Decennial Census. The report area has a total 10 Head Start programs with a rate of 25.18 per 10,000 children under 5 years old.

Report Area	Children Under Age 5	Total Head Start Programs	Head Start Programs, Rate (Per 10,000 Children)
Report Location	3,972	10	25.18
Benton County, MO	826	0	0

## Income - Median Family Income

This indicator reports median family income based on the latest 5-year American Community Survey estimates. A family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption. Family income includes the incomes of all family members age 15 and older.

Report Area	Total Family Households	Average Family Income	Median Family Income
Report Location	15,580	\$70,306	No data
Benton County, MO	5,014	\$70,852	\$52,185

## Income - Per Capita Income

The per capita income for the report area is \$23,806. This includes all reported income from wages and salaries as well as income from self-employment, interest or dividends, public assistance, retirement, and other sources. The per capita income in this report area is the average (mean) income computed for every man, woman, and child in the specified area.

Report Area	Total Population	Total Income (\$)	Per Capita Income (\$)

United States	\$20,515.00	\$37,088.00

## Income - Families Earning Over \$75,000

In the report area, 33.55%, or 5,227 families report a total annual income of \$75,000 or greater. Total income includes all reported income from wages and salaries as well as income from self-employment, interest or dividends, public assistance, retirement, and other sources. As defined by the US Census Bureau, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption. A non-family household is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

Report Area	Total Families	Families with Income Over \$75,000	Percent Families with Income Over \$75,000

United States	2,853,791	\$9,025,493,300	\$3,162

## Income - Inequality (GINI Index)

This indicator reports income inequality using the Gini coefficient. Gini index values range between zero and one. A value of one indicates perfect inequality where only one house-hold has any income. A value of zero indicates perfect equality, where all households have equal income.

Index values are acquired from the 2015-19 American Community Survey and are not available for custom report areas or multi-county areas.

Report Area	Total Households	Gini Index Value
Report Location	23,905	No data

## Poverty - Population Below 100% FPL

Poverty is considered a *key driver* of health status.

Within the report area 16.80% or 10,140 individuals are living in households with income below the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

Report Area	Total Population	Population in Poverty	Population in Poverty, Percent
Report Location	60,359	10,140	16.80%

## Population in Poverty by Ethnicity Alone

This indicator reports the population in poverty in the report area by ethnicity alone.

Report Area	Hispanic or Latino	Not Hispanic or Latino	Hispanic or Latino, Percent	Not Hispanic or Latino, Percent
Report Location	1,021	9,119	25.31%	16.19%
Benton County, MO	163	3,183	41.69%	17.24%
Pettis County, MO	858	5,936	23.55%	15.68%
Missouri	54,628	755,417	22.09%	13.31%
United States	11,256,244	31,254,599	19.64%	12.05%

## Population in Poverty Race Alone, Percent

This indicator reports the percentage of population in poverty in the report area by race alone.

Report Area	White	Black or African American	Native American or Alaska Native	Asian	Native Hawaiian or Pacific Islander	Some Other Race	Multiple Race
Report Location	15.75%	39.08%	44.61%	13.90%	75.00%	17.90%	29.55%
Benton County, MO	16.68%	45.24%	52.04%	0.00%	No data	0.00%	41.80%
Pettis County, MO	15.30%	38.89%	0.00%	14.70%	75.00%	18.47%	24.62%
Missouri	11.68%	24.75%	22.23%	14.17%	26.80%	27.22%	20.14%
United States	11.15%	23.04%	24.86%	10.94%	17.51%	21.04%	16.66%

## Population in Poverty by Race, Total

This indicator reports the total population in poverty in the report area by race alone.

Report Area	Non-Hispanic White	Black or African American	Native American or Alaska Native	Asian	Native Hawaiian or Pacific Islander	Some Other Race	Multiple Race
Report Location	8,826	567	153	41	9	167	377
Benton County, MO	3,021	19	153	0	0	0	153
Pettis County, MO	5,805	548	0	41	9	167	224
Missouri	569,988	165,414	5,751	16,628	2,082	18,942	31,240
United States	25,658,220	9,114,217	660,695	1,922,319	101,826	3,313,183	1,740,383

## Poverty - Population Below 185% FPL

In the report area 37.98% or 22,923 individuals are living in households with income below 185% of the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

Report Area	Total Population	Population with Income at or Below 185% FPL	Percent Population with Income at or Below 185% FPL
Report Location	60,359	22,923	37.98%
Benton County, MO	18,856	7,349	38.97%
Pettis County, MO	41,503	15,574	37.52%
Missouri	5,922,570	1,733,818	29.27%
United States	316,715,051	89,440,015	28.24%

Note: This indicator is compared to the state average.

## Housing Cost Burden (30%)

This indicator reports the percentage of the households where housing costs are 30% or more of total household income. This indicator provides information on the cost of monthly housing expenses for owners and renters. The information offers a measure of housing affordability and excessive shelter costs. The data also serve to aid in the development of housing programs to meet the needs of people at different economic levels. Of the 23,905 total households in the report area, 5,638 or 23.59% of the population live in cost burdened households.

Report Area	Total Households	Cost Burdened Households (Housing Costs Exceed 30% of Income)	Cost Burdened Households, Percent
Report Location	23,905	5,638	23.59%
Benton County, MO	7,872	1,862	23.65%
Pettis County, MO	16,033	3,776	23.55%
Missouri	2,414,521	616,342	25.53%
United States	120,756,048	37,249,895	30.85%

Data Source: US Census Bureau, American Community Survey, 2015-19. Source geography: Tract

Cost Burdened Households (Housing Costs Exceed 30% of Household Income), Percent by Tract, ACS 2015-19

## Cost Burdened Households by Tenure, Total

These data show the number of households that spend more than 30% of the household income on housing costs. In the report area, there were 5,638 cost burdened households according to the U.S. Census Bureau American Community Survey (ACS) 2015-2019 5-year estimates. The data for this indicator is only reported for households where household housing costs and income earned was identified in the American Community Survey.

Report Area	Cost Burdened Households	Cost Burdened Rental Households	Cost Burdened Owner Occupied Households (With Mortgage)	Cost Burdened Owner Occupied Households (With No Mortgage)
Report Location	5,638	2,669	2,067	902
Benton County, MO	1,862	567	870	425
Pettis County, MO	3,776	2,102	1,197	477
Missouri	616,342	332,065	216,151	68,126
United States	37,249,895	20,002,945	13,400,012	3,846,938

## Cost Burdened Households by Tenure, Percent

These data show the percentage of households by tenure that are cost burdened. Cost burdened rental households (those that spent more than 30% of the household income on rental costs) represented 41.38% of all of the rental households in the report area, according to the U.S. Census Bureau American Community Survey (ACS) 2015-2019 5-year estimates. The data for this indicator is only reported for households where tenure, household housing costs, and income earned was identified in the American Community Survey.

Report Area	Rental Households	Percentage of Rental Households that are Cost Burdened	Owner Occupied Households (With Mortgage)	Percentage of Owner Occupied Households w/ Mortgages that are Cost Burdened	Owner Occupied Households (No Mortgage)	Percentage of Owner Occupied Households w/o Mortgages that are Cost Burdened
Report Location	6,450	41.38%	8,898	23.23%	8,557	10.54%
Benton County, MO	1,446	39.21%	2,862	30.40%	3,564	11.92%
Pettis County, MO	5,004	42.01%	6,036	19.83%	4,993	9.55%
Missouri	802,535	41.38%	991,434	21.80%	620,552	10.98%
United States	43,481,667	46.00%	48,416,627	27.68%	28,857,754	13.33%

## Households with No Motor Vehicle

This indicator reports the number and percentage of households with no motor vehicle based on the latest 5-year American Community Survey estimates. Of the 23,905 total households in the report area, 1,768 or 7.40% are without a motor vehicle.

Report Area	Total Occupied Households	Households with No Motor Vehicle	Households with No Motor Vehicle, Percent
Report Location	23,905	1,768	7.40%
Benton County, MO	7,872	543	6.90%
Pettis County, MO	16,033	1,225	7.64%
Missouri	2,414,521	165,906	6.87%
United States	120,756,048	10,395,713	8.61%

## Households with No Motor Vehicle by Tenure

Report Area	Owner-Occupied Households	Owner-Occupied Households, Percent	Renter-Occupied Households	Renter-Occupied Households, Percent
Report Location	627	3.59%	1,141	17.69%
Benton County, MO	258	4.01%	285	19.71%
Pettis County, MO	369	3.35%	856	17.11%
Missouri	43,177	2.68%	122,729	15.29%
United States	2,414,113	3.12%	7,981,600	18.36%

## Insurance - Population Receiving Medicaid

This indicator reports the percentage of the population with insurance enrolled in Medicaid (or other means-tested public health insurance). This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs; when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

Report Area	Total Population (For Whom Insurance Status is Determined)	Population with Any Health Insurance	Population Receiving Medicaid	Percent of Insured Population Receiving Medicaid
Report Location	60,650	52,579	11,953	22.73%
Benton County, MO	18,902	16,666	3,586	21.52%
Pettis County, MO	41,748	35,913	8,367	23.30%
Missouri	5,990,637	5,430,752	885,264	16.30%
United States	319,706,872	291,458,259	64,716,091	22.20%

Note: This indicator is compared to the state average.

## Population Receiving SNAP Benefits (ACS)

In the report area, an estimate 2,991 or 12.51% households receive Supplemental Nutrition Assistance Program (SNAP) benefits. The value for the report area is greater than the national average of 11.74%. This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs; when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

Report Area	Total Households	Households Receiving SNAP Benefits	Percent Households Receiving SNAP Benefits

## Population Receiving SNAP Benefits (SAIPE)

The Supplemental Nutrition Assistance Program, or SNAP, is a federal program that provides nutrition benefits to low-income individuals and families that are used at stores to purchase food. This indicator reports the average percentage of the population receiving SNAP benefits during the month of July during the most recent report year.

Report Area	Total Population	Population Receiving SNAP Benefits	Population Receiving SNAP Benefits, Percent
Report Location	61,572.00	9,252	15%
Benton County, MO	19,068.00	2,626	13.8%
Pettis County, MO	42,504.00	6,626	15.6%
Missouri	6,108,612.00	745,977	12.2%
United States	325,147,121.00	40,771,688	12.5%

Percentage of Total Population Receiving SNAP Benefits

Note: This indicator is compared to the state average.

## Food Insecurity Rate

This indicator reports the estimated percentage of the population that experienced food insecurity at some point during the report year. Food insecurity is the household-level economic and social condition of limited or uncertain access to adequate food.

Report Area	Total Population	Food Insecure Population, Total	Food Insecurity Rate
Report Location	61,206	8,400	13.72%
Benton County, MO	19,000	2,660	14.00%
Pettis County, MO	42,206	5,740	13.60%
Missouri	6,094,366	865,400	14.20%
United States	325,717,422	41,133,950	12.63%

Note: This indicator is compared to the state average.

Percentage of Total Population with Food Insecurity

Food Insecure Population, Percent by County, Feeding America 2017

## Food Insecurity - Food Insecure Children

This indicator reports the estimated percentage of the population under age 18 that experienced food insecurity at some point during the report year. Food insecurity is the household-level economic and social condition of limited or uncertain access to adequate food.

Report Area	Population Under Age 18	Food Insecure Children, Total	Child Food Insecurity Rate
Report Location	13,944	2,680	19.22%
Benton County, MO	3,349	720	21.50%
Pettis County, MO	10,595	1,960	18.50%
481,834	87,694	18.20%	
United States	73,641,039	13,411,620	18.21%

## Food Insecurity - Food Insecure Population Ineligible for Assistance

This indicator reports the estimated percentage of the total population and the population under age 18 that experienced food insecurity at some point during the report year, but are ineligible for State or Federal nutrition assistance. Food insecurity is the household-level economic and social condition of limited or uncertain access to adequate food. Assistance eligibility is determined based on household income of the food insecure households relative to the maximum income-to-poverty ratio for assistance programs (SNAP, WIC, school meals, CSFP and TEFAP).

Report Area	Food Insecure Population	Food Insecure Population Ineligible for Assistance, Percent	Food Insecure Children	Food Insecure Children Ineligible for Assistance, Percent
Report Location	8,400	18.00%	2,680	18.00%
Benton County, MO	2,660	16.00%	720	11.00%
Pettis County, MO	5,740	20.00%	1,960	21.00%
Missouri	865,400	36.00%	243,110	35.00%
United States	41,133,950	33.00%	13,411,620	35.00%

## Racial Diversity (Theil Index)

This indicator measures the spatial distribution or evenness of population demographic groups in neighborhoods throughout the county. This indicator is presented as an index with values ranging between 0 and 1, with higher values indicating higher levels of segregation between neighborhoods.

Report Area	Non-Hispanic White Population	Non-Hispanic Black Population	Non-Hispanic Asian Population	Non-Hispanic AI / AN Population	Non-Hispanic NH / PI Population	Hispanic or Latino Population	Diversity Index
Report Location	89.05	2.41	0.58	0.44	0.20	7.31	0.15

- Report Location

### Racial Segregation (Interaction Index)

This indicator measures the spatial segregation of population demographic groups. The indicator is presented as an index with values ranging between 0 and 1, with higher values indicating greater levels of segregation. This indicator specifically measures segregation between the White (Non-Hispanic) and Black (Non-Hispanic) population.

Report Area	Total Population	Non-Hispanic White Population	Non-Hispanic Black Population	Segregation Index
Report Location	62,517	55,957	1,748	No data

## Social Capital Index

Social capital is a measure of economic benefits gained from cooperation between individuals and groups. The indicator measures each county's social capital as an index relative to all other counties in the United States. An index score of less than 0 indicates lower economic benefits while a score of more than 0 indicates higher economic benefits from cooperation between individuals and groups.

Report Area	Total Population (2014)	Associations, Rate per 100,000 Population (2014)	Total Not-for-Profit Associations (2014)	Census Mail-In Response Rate (2010)	Average Voter Turnout Rate (2012)	Social Capital Index < 0 = Low > 0 = High

## Lack of Social or Emotional Support

This indicator reports the percentage of adults aged 18 and older who self-report that they receive insufficient social and emotional support all or most of the time. This indicator is relevant because social and emotional support is critical for navigating the challenges of daily life as well as for good mental health. Social and emotional support is also linked to educational achievement and economic stability.

Report Area	Total Population Age 18+	Estimated Population Without Adequate Social / Emotional Support	Crude Percentage	Age-Adjusted Percentage

## **Dissemination Plan**

A requirement of the community health needs assessment is to disseminate the final report and make it widely available to the public. Bothwell Regional Health Center's plan for sharing the CHNA with the community is provided below:

- Post CHNA on the brhc.org website
- Promote on Bothwell's Facebook page at [facebook.com/bothwellregional](https://facebook.com/bothwellregional)
- Distribute press release regarding findings and availability of the complete report:
  - The Sedalia Democrat
  - Benton County Enterprise
  - Cole Camp Courier
  - Lincoln New Era
  - Windsor Review
  - KDRO/KPOW
  - KSIS/KIXX
  - KAYQ
  - Sedalia Area Chamber of Commerce weekly e-newsletter
  - Warsaw Chamber of Commerce e-newsletter

Requests for printed copies may be made by contacting Bothwell Marketing at 660-827-8855 or [info@brhc.org](mailto:info@brhc.org). Printed copies for review will be available at:

- Bothwell Regional Health Center Marketing Office
- Katy Trail Community Health
- Pettis County Health Center
- Pettis County Community Partnership
- Sedalia Senior Center
- Warsaw Senior Center
- Benton County Health Department

Many of the places provided with a printed copy serve lower socioeconomic populations, medically underserved and the chronically ill.

## **Community Resources**

Information about community resources is provided in the Pettis County and Benton County resource documents available in the appendix.

## **Appendices**

- County Health Rankings & Roadmaps, Robert Wood Johnson Foundation
  - Pettis County
  - Benton County
  - Comparison of Pettis and Benton Counties
- 2021 Status Report on Missouri's Substance Use and Mental Health
  - Pettis County
  - Benton County
- Pettis County Resource Directory
- Benton County Health Department Community Resources Document

Emergency Room, then Discharged	3,595	8,185	5,213
Emergency Room, then Admitted	66	746	676
Admitted without Emergency Room	740	1,614	641

<sup>1</sup> Multi-county Kansas City hepatitis and TB case reports are included in Jackson County totals and all Joplin case reports are included in Jasper County totals.

<sup>2</sup> Hospital counts for alcohol, drug, and mental disorders are based on diagnosis codes determined by the national Healthcare Cost and Utilization Program. Individuals are counted only once in each applicable diagnosis group regardless of number of times receiving hospital services in the calendar year.

<sup>3</sup> In 2019 the National Incident Based Reporting System replaced the Uniform Crime Reporting system for Missouri crime and arrest reports. 2019 crime data might not be fully comparable to crime data in prior years.

<sup>4</sup> DSS Children's Division reports do not capture reasons for removal but document conditions present. There are often multiple conditions and factors considered when a child is placed out of the home. Only the substance use conditions are included in this profile.

Emergency Room, then Discharged	969	1,487	1,229
Emergency Room, then Admitted	48	385	398
Admitted without Emergency Room	534	659	444

<sup>1</sup> Multi-county Kansas City hepatitis and TB case reports are included in Jackson County totals and all Joplin case reports are included in Jasper County totals.

<sup>2</sup> Hospital counts for alcohol, drug, and mental disorders are based on diagnosis codes determined by the national Healthcare Cost and Utilization Program. Individuals are counted only once in each applicable diagnosis group regardless of number of times receiving hospital services in the calendar year.

<sup>3</sup> In 2019 the National Incident Based Reporting System replaced the Uniform Crime Reporting system for Missouri crime and arrest reports. 2019 crime data might not be fully comparable to crime data in prior years.

<sup>4</sup> DSS Children's Division reports do not capture reasons for removal but document conditions present. There are often multiple conditions and factors considered when a child is placed out of the home. Only the substance use conditions are included in this profile.

## **PETTIS COUNTY RESOURCE GUIDE**

**Pettis County Community Partnership  
1400 S. Limit Ste. 29  
Sedalia, MO 65301  
Ph: 660-827-0560  
F: 660-827-0633**

*This directory is generously compiled, published, and maintained by  
**Pettis County Community Partnership***

**Please notify us of any additions or changes.**

## **What Does Pettis County Community Partnership Offer?**

### **Pettis County Community Partnership (PCCP)**

1400 S. Limit, Ste. 29

Sedalia, MO 65301

PH: (660) 827-0560 F: (660) 827-0633

**Pettis County Community Partnership**

**Baby Think it Over:** Our Baby Think It Over program uses computerized dolls to simulate what it is like to care for an infant. The program also promotes abstinence and infant safety. Baby Think It Over simulators and curriculum materials are available for loan to schools, youth groups, scouts, and other teen-serving organizations/programs.

**MRCC Food Co-op:** Partnering with the Missouri Rural Crisis Center, once each month we can offer people approximately \$40 worth of groceries for \$22. Co-op members pay an annual membership fee of \$10 and the \$22 monthly co-op fee each month they receive an order of food which includes bread, produce, paper products, and canned goods, as well as MRCC's own Patchwork Farms meat products. Members may request multiple orders at the same price per order. Additional meat may be ordered at reasonable rates. All participants of the food cooperative must be current MRCC members. Anyone may participate, regardless of income.

**The Community Closet:** PCCP has a supply of personal care and household items donated by the community that are available to people in need who are our clients or are referred by a partner agency. Donations of diapers, wipes, hygiene items, toilet paper, paper towels, Kleenex, feminine products, etc. are always welcome throughout the year.

**Community Resource Directory:** We publish a directory of community resources that is available in our lobby at any time. Please contact our Executive Assistant to have information added or updated for your agency.

**PCCP Housing Services:** PCCP receives grants from various sources to assist people who are literally homeless, or imminently homeless, in securing stable housing. Skilled case managers interview potential clients to determine whether the client meets the funder's requirements for assistance. Assistance may be provided, as funds are available, to people who qualify. Determination is made on a case-by-case basis.

**P.R.O.P. – Putting Roofs Over People:** The branch of our housing efforts where PCCP staff members meet with other social service agencies, schools, churches, businesses and individuals to discuss efforts and needs around homelessness in order to provide coordination around housing and other assistance for meeting needs of vulnerable populations.

**Homeless Hotline – (660) 287-2228:** We serve people who are literally and chronically homeless through the Coordinated Entry hotline serving 9 counties in west central Missouri (Johnson, Lafayette, Pettis, Saline, Benton, Bates, Cass, Henry, and St. Clair). Call the hotline to begin the intake process.

**Pillars of Pettis County:** This is a group of community partners who are working to find a viable solution to provide transitional housing for people who are homeless in Pettis County. The meetings are held in the PCCP conference room.

**MO Reentry Process Steering Group:** Community partners share and coordinate resources around housing, education, family support, employment, mental health, and other issues. All with an interest in reentry are welcome to attend. Meetings are held on the first Monday of each month at noon in the PCCP conference room.

**Multicultural Services:** Cherishing diversity of our residents, PCCP strives to heighten cultural awareness and appreciation.

**Family Nutrition Education (Spanish & English):** Our educators help families learn how a well-balanced meal promotes child development and adult health. University of MO Extension is our partner.

### **Open monthly meetings hosted by Pettis County Community Partnership:**

- **Missouri Reentry Process (MRP) of Pettis County**--addressing reentry issues: 3rd Monday at noon.
- **P.R.O.P. Putting Roofs Over People**--addressing homelessness issues: 4<sup>th</sup> Monday at 11:00 am.

## **Pettis County Community Partnership's PROP (Putting Roofs Over People) Housing Program Process**

**\*\*ALL ADULTS IN HOUSEHOLD MUST COMPLETE AN APPLICATION\*\***

To process an application for assistance, we **MUST** first have all the following:

1. Photo ID for everyone 18 or older in the home
2. Social Security Cards for everyone in the home
3. Proof of Income **(ALL that apply)**
  - a) Paystubs for the most recent 30 days
  - b) Child Support Payment Verification
  - c) Self Employed – last tax return
  - d) Bank statement printout for 6 months (average balance)
  - e) Unemployment Income Verification
  - f) TANF Verification
  - g) Social Security Award Letter – current year
  - h) All other income
4. Eviction Notice/Utility Shut-Off Notice
5. Verification of Delinquency (we provide as necessary)
6. Current lease (signed & dated)
7. Rental Assistance Agreement (we provide as necessary)

To provide housing or utility assistance, all housing units **MUST** pass a housing inspection. The unit must be **SAFE, DECENT, and SANITARY.**

- All utilities **MUST** be on & working.
- All windows, doors, lights, and plumbing must work.
- The unit must have working smoke detectors.
- No broken or boarded up windows or doors.

Please note: No guarantees of assistance will be made until all documents are provided and approved, and the unit has passed our housing inspection.

Please reach out to us with any questions that you may have at (660) 827-0560.

### Abuse

#### Child Abuse

##### - Child Safe of Central MO Inc

Provider: Child Safe of Central MO Inc.

Description of service, support, educational opportunity:

Coordinate a multidisciplinary team approach to child sexual abuse investigations: Videotaped forensic interviews of alleged child abuse victims, conducted in a child-friendly environment by a specially trained interviewer; child advocacy; SAFE-CARE medical exams on-site. On-site counseling services are also currently available until the end of 2010.

Also provide community education concerning child abuse; mandated reporter training

Services available to: Alleged child abuse victims.

Community education regarding prevention and information on child sexual abuse to groups – no limit on number

Mandated Reporter training available to groups

When: Interview services available only upon referral from Children's Division or law enforcement. Monday-Friday 8-5 with emergency hours available as needed. Medical SAFE-CARE exams available by appointment – no emergency services for medical exams.

Location of service/presentation: In-house services provided at 102 E. 10th, Sedalia, MO for 11 mid-Missouri counties, including Benton County.

Will go to group location for community education.

Estimated Cost: All services are provided free of charge, including SAFE-CARE medical exams.

Point of contact to make the appointment or register for this service:

Referrals for forensic interview of alleged child abuse victim must come from Children's Division or law enforcement. There must be a child abuse/neglect hotline or law enforcement report.

## Smoking

### - **Bothwell Regional Health Center**

Provider: Bothwell Regional Health Center

Description of service, support, educational opportunity:

#### FREEDOM FROM SMOKING

Smokers who are ready to kick the habit can find the support and resources they need to be successful through our smoking cessation course. We follow the American Lung Association's eight-session "Freedom from Smoking" program.

During the first three sessions, participants prepare a plan for quitting. The fourth session is "quit day," and sessions five through eight are about maintaining a smoke-free life. Each session features activities and assignments that provide participants with the tools to quit smoking. The process includes both individual and group work.

Sessions are offered on a periodic basis throughout the year. The cost is \$45 per person. Call Community Outreach at (660) 827-9138 for more information.

Services available to: Individuals

When: Call for session dates and times.

Location of service/presentation: Contact Community Outreach for location(s)

Estimated Cost: \$45

If there is a cost, is it generally covered by insurance? No

Point of contact to make the appointment or register for this service:

Community Outreach

660-827-9138

classes@brhc.org

601 E. 14th Street, Sedalia, MO 65301

### - **Katy Trail Health Clinic**

Provider: Katy Trail Community Health

Description of service, support, educational opportunity:

Katy Trail Community Health Clinic has a program that can help you quit smoking.

Maybe you have tried to quit smoking before. No matter how many times you have tried, this time can be different with our new program to help you quit. We are now providing Auricular Therapy to help our patients quit smoking.

What is Auricular Therapy? Auricular Therapy is FDA approved safe, helpful treatment of the nerves on the ears.

Auricular Therapy is offered at Katy Trail Community Health in Warsaw. Call today to make an appointment with one of our providers and see if this treatment is best for you.

Services available to: Individuals

When: By Appointment

Location of service/presentation: 17571 N Dam Access Rd, inside Harbor Village, Warsaw

## Cardio (Heart)

### Bothwell Regional Health Center

Provider: Bothwell Regional Health Center

Description of service, support, educational opportunity:

You may not be a medical professional, but you may one day have an opportunity to help save a life by knowing CPR. Several times during the year, Bothwell offers a half-day course to teach participants how to provide CPR to an adult, child or infant and how to use an automated external defibrillator (AED) for adults and children. Participants also may add an optional half-day course on first aid for adults and children. Typical participants in these classes include corporate and retail employees, security, law enforcement, health and fitness staff, parents and grandparents. Special classes can be arranged for large groups.

The credentialed course curriculum is provided by the American Heart Association and includes a skills test. CPR and AED completion cards are presented. The course does not meet the special requirements for health-care provider certification.

The cost is \$35 per person for either CPR or First Aid, or \$50 per person to take both classes. Class sizes are limited and require registration. For more information or to find out class dates, e-mail [classes@brhc.org](mailto:classes@brhc.org) or call (660) 827-9138.

Services available to: Individuals or groups

When: Periodically as indicated by registration

Location of service/presentation: Bothwell Education Center, 14th Street and South Ingram Avenue, Sedalia

Estimated Cost: \$35 per person for either CPR or First Aid, or \$50 per person to take both classes.

### Bothwell Regional Health Center

Provider: Bothwell Regional Health Center

Description of service, support, educational opportunity:

Cardiac Rehabilitation is a four-phase, medically supervised exercise therapy program designed to help people with heart disease to return to a productive life by improving their health through physical activity.

The Cardiac Rehab program uses a multi-disciplinary approach of structured, progressive physical activity administered by trained therapists. Program participants and their families are educated about recognizing, preventing and treating cardiovascular disease.

Special emphasis is placed on modifying risk factors and recovering from the physical and psycho-social aspects of heart disease.

The outpatient cardiac rehabilitation is for patients who have been diagnosed with heart disease, which includes those who have suffered a heart attack or had heart surgeries. One phase of the program is applicable to those with cardiovascular risk factors, but who haven't necessarily been diagnosed with a heart disease, including spouses of patients.

Services available to: Individuals

When: By appointment

Location of service/presentation: Bothwell Regional Health Center, Sedalia

Estimated Cost: Many cardiac rehabilitation services are covered by most insurance packages including Medicare/Medicaid, depending on the clinical diagnosis. Pre-approval is required by some insurance providers.

Point of contact to make the appointment or register for this service: For more information contact Cardiac Rehabilitation at (660) 827-9556.

**Golden Valley Memorial Hospital**

-----  
**Bothwell Regional Health Center**

Provider: Bothwell Regional Health Center

Description of service, support, educational opportunity: All people with diabetes and their family members are invited to attend the Diabetes Support Group at no cost. The purpose of the group is to provide support to individuals and their families who have diabetes in an environment where they can share their feelings and gain valuable tips from others who are in the same situation.

Studies show that attending a diabetes support group can help reduce stress and have a positive effect on the health of those with diabetes. Information on a variety of topics related to diabetes is provided to help individuals better manage their condition.

Services available to: Individuals

When: 11:00 a.m. on the third Tuesday of each month

## Fibromyalgia

See Arthritis

### - Golden Valley Memorial Hospital

Provider: Bothwell Regional Health Center

Description of service, support, educational opportunity:

To educate people about the grieving process. To bring people together to share and help each other grieve after the loss of a loved one. To emphasize that each person's grief is individual, no two people grieve exactly alike, and that grieving is a lengthy process that takes longer than is generally recognized by society.

The goal of healing a loss is to remember the person you love without the constant overwhelming pain of the loss.

When: Call for dates / times.

Location of service/presentation: Bothwell Education Center, 600 E. 14th St., Sedalia

Estimated Cost: Free

Contact: Stephanie Fraley, Community Outreach, (660) 827-9138

## Stroke

**Support Group****- Bothwell Regional Health Center**

Provider: Bothwell Regional Health Center

Description of service, support, educational opportunity:

**FREEDOM FROM SMOKING**

Smokers who are ready to kick the habit can find the support and resources they need to be successful through our smoking cessation course. We follow the American Lung Association's eight-session "Freedom from Smoking" program.

During the first three sessions, participants prepare a plan for quitting. The fourth session is "quit day," and sessions five through eight are about maintaining a smoke-free life. Each session features activities and assignments that provide participants with the tools to quit smoking. The process includes both individual and group work.

Sessions are offered on a periodic basis throughout the year. The cost is \$45 per person. Call Community Outreach at (660) 827-9138 for more information.

Services available to: Individuals

When: Call for session dates and times.

Location of service/presentation: Contact Community Outreach for location(s)
