## Introduction

This report synthesizes and summarizes existing secondary data derived from multiple sources on community health indicators in Pettis and Benton counties. Multiple indicators, such as demographics, socio and economic factors, health conditions, risk factors, preventable practices and access to care, among other targeted community indicators, were used to help identify the current gaps within these communities.

A central goal of the secondary data analysis was to better grasp the most significant health issues facing the primary service area in general. ZIP code-level analysis was used for the top issues identified in an effort to recognize the specific populations within the respective counties that were disproportionately affected. A person's ZIP code is more predictive of their health than their genetic code. Having detailed, local information on health factors and health outcomes in the places where Missourians live can help community health leaders take action to create and sustain a healthy Missouri. It provides unique information on the top health factors facing counties in Missouri and the healthiest and least-healthy ZIP codes within each county. The data are arranged to include which health and social factors should be prioritized in each ZIP code. This analysis also will seek to help advance health equity and surgically target interventions where they are most needed.

Lastly, background and content for the collection of primary survey data were provided to supplement existing data for a holistic picture of community health in the primary service area of Bothwell Regional Health Center.

## **Executive Summary**

The people served by Bothwell Regional Health Center in Pettis and Benton counties in central Missouri live in a rural area that includes many unique qualities that citizens have the opportunity to experience and enhance their quality of life.

Education and cultural experiences are readily available. State Fair Community College's flagship campus is located in Pettis County with other locations throughout the central Missouri region. The Daum Museum of Contemporary Art and the Liberty Center Association for the Arts provide arts and entertainment.

People seeking outdoor recreation can choose among many activities including a robust park system in Sedalia, bike riding on the Katy Trail and fishing or water sports on nearby Truman Lake or Lake of the Ozarks. Sedalia, located in Pettis County, serves as home to the Missouri State Fair, which attracts approximately 400,000 visitors annually as well as the annual Scott Joplin music festival.

The occupations of supervisors of retail sales workers, elementary school teachers and secondary school teachers have large numbers of projected total openings, as well as having average wages that are higher than the average wage for all occupations in the west central region. According to unemployment statistics published by the Missouri Economic Research and Information Center database, the April 2019 unemployment rates for Missouri were 2.9 percent, 3.4 percent for the west central Missouri region, 2.9 percent for Pettis County and 4.2 percent for Benton County.

The community and region provide opportunity to leverage resources to address health issues identified in this community health needs assessment. The collection and analysis of primary survey and available secondary data from various sources identify three key themes from which efforts to improve health status and health outcomes may focus.

### **Increase Access to Primary Care, Mental Health and Dental**

According to the findings of the primary survey results of the 551 total number of individuals completing the survey, counseling/mental health services, alcohol and drug abuse treatment, and adult primary care services were identified as the top three medical services needed most in their community.

Secondary data support the community perspective regarding limited access to basic services. The current uninsured rate for both counties combined is 13.11 percent with nearly one in five adults living in poverty. One in four children living in Pettis County and nearly one in four Benton County children under age 18 live in poverty at 100 percent Federal Poverty Level.

The Robert Wood Johnson County Health Rankings 2019 report denotes the ratio of primary care physicians to residents lags behind Missouri (1,420:1) for both Benton County (3,770:1) and Pettis County (1,920:1). See Appendix A.

Similarly, the severe shortage of dentists is noted in Benton County with more than twice as many residents per dentists (4,770:1) as compared to Missouri (1,760:1) or Pettis County (1,770:1). See Appendix A.

### **Healthy, Active Living and Reduction of Obesity**

A review of the primary survey results reveals that obesity was among the top issues doctors addressed with patients during their visits. A further review reveals about 40 percent of respondents reported being told by their doctor they had high blood pressure and needed to lose weight. On the same note, 30 percent reported to have been told they had high blood sugar or diabetes. All these health factors align with the secondary data, thus requiring a comprehensive approach in addressing them through diet and exercise. When asked about the types of health education services most needed in the community, diet and/or exercise was at the top of the list.

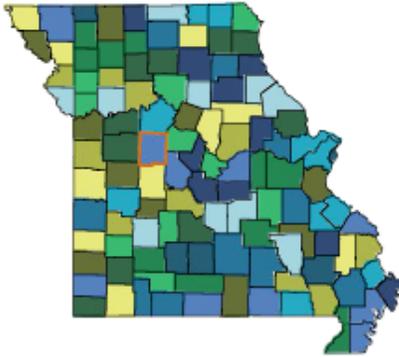

The secondary data support this focus. According to the Robert Wood Johnson County Health Rankings 2019 report, both [Pettis](#) and [Benton](#) County have higher rates of adult obesity at 36 and 34 percent respectively compared to the state rate of 32 percent. Both have a higher percent of physical inactivity compared to the state. These health factors have a strong upstream influence on health outcomes of mortality and morbidity. County level study survey data from the Missouri Department of Health and Senior Services further reveals a higher percent of respondents reported that their health was in fair or poor status in Benton County compared to Pettis County. From a population health management standpoint, there is a great opportunity for care coordination with primary care providers and other community partners.

### **Enhance Services to Address Mental Health and Substance Abuse**

When primary survey respondents were asked about the medical services most needed in their community, counseling/mental health and alcohol and drug use were the top two issues identified. Community drug abuse and alcohol abuse health education services topped the list.

According to the [Pettis County](#) 2018 Status Report on Missouri's Substance Use and Mental Health, there were 189 hospitalizations in 2016 with a mental health primary diagnosis and 696 with a secondary diagnosis for mental health. The same report showed 19 hospitalizations with an alcohol primary diagnosis and 125 with alcohol as the secondary diagnosis. Lastly, 12 hospitalizations listed a drug-related primary diagnosis and 141 as the secondary diagnosis. [Benton County](#), on the other hand, had 75 hospitalizations with mental illness as a primary diagnosis in 2016 and 412 as the secondary. Related to alcohol, seven hospitalizations listed it as the primary diagnosis and 62 as the secondary. Drug use was the primary and secondary diagnosis for 12 and 68 hospitalizations respectively. See Appendix B.

## Spotlight on ZIP Health

### Highlighted County-Level Issues for Pettis County

Health Factor	Prevalence (%)	State Prevalence (%)
Depressive Disorder	19.07	23.04

## **Recommendation**

Identifying specific populations and specific health behaviors and health outcomes that are influenced by the three health issues will enable providers and the community to focus resources and attention on priority areas. Of greatest importance is access to coordinated care to promote secondary prevention and chronic care management.

A myriad of strategies may be employed to address these seemingly disparate health issues. For example, work with community citizens, partner organizations and providers to educate about the prevalence of people at-risk of diabetes provides a platform to promote primary prevention through physical activity and healthy eating; implement simple screening tools in organizations and primary care settings to identify people at risk of diabetes; and incorporate care coordination with specialists to reduce complications such as heart disease. Although implementation may be broad, focused implementation and evaluation must target specific populations or organizations to determine the effect. Health status and health outcomes will not change notably within a three-year period of time across a community. However, health outcomes such as preventable hospitalizations for short-term complications of diabetes may suggest improved access and care coordination within primary care settings.

Addressing mental health and substance abuse must be a long-term strategy. The many factors including lack of access, stigmatization and factors contributing to all substance abuse, including prescription, illegal alcohol and tobacco use, require the cooperation of many partner organizations. However, based on survey respondents, the community may be ready to begin addressing this very complex health issue.

## **Community Defined**

Bothwell Regional Health Center's primary service area includes Pettis and Benton counties. It also extends into a 40-mile radius that reaches six contiguous counties: Saline, Johnson, Henry, Moniteau, Morgan and Cooper. Specific data was not collected for the secondary market area.

## **Community Characteristics**

Bothwell Regional Health Center serves an area diverse in agriculture and manufacturing industries. Pettis County is home to State Fair Community College, which has programs in nursing, radiologic technology, dental hygiene, occupational therapy assistant, health care specialist with emphasis in nurse aide, pharmacy technology and health information technology. Tourism in Pettis County is driven by the presence of the Missouri State Fair which hosts about 400,000 visitors during the annual event each August. Additionally, the fairgrounds is the venue for many events throughout the year. The Katy Trail and Sedalia's annual Scott Joplin Festival attract visitors to the community as well.

Located on U.S. Highways 50 and 65, Pettis County enjoys the comforts of rural communities with urban life and the Lake of the Ozarks within an hour's drive. It is a community rich in arts and entertainment with the Daum Museum of Contemporary Art housed on the campus of State Fair Community College and the Liberty Center Association for the Arts located in downtown Sedalia. The Sedalia community boasts a healthy parks system with seven parks, two outdoor aquatic centers, walking trails and a skate park.

A spirit of giving runs deep in Pettis County. Beginning with its foundation, Sedalia has been home to folks who know the importance of giving back to the community. Even Bothwell Regional Health Center, which opened in 1930, was the result of an effort by John Homer Bothwell to build a hospital in Sedalia. He pledged \$150,000 in seed money and encouraged the community to also support the project. The community has strong foundations benefiting education and health care, a United Way organization that allocates more than a half-million dollars to community agencies each year, and Open Door Ministries, which serves as a food pantry and thrift shop and provides financial assistance to low-income families.

In Benton County, Truman Lake and the Harry S. Truman Dam and Reservoir Visitor Center attract many visitors. The amenities attract many retirees. Currently, Harbor Village — a project of Katy Trail Community Health, the Warsaw Senior Center and Pathways Community Behavioral Health — is a 24,800-square-foot facility that houses multiple health and social services. These services include personal care managers, senior meals, adult care programs, recreational and educational programming for adults, wellness programs, financial and insurance assistance, and an entrepreneurial business center.

### **Other Health Services**

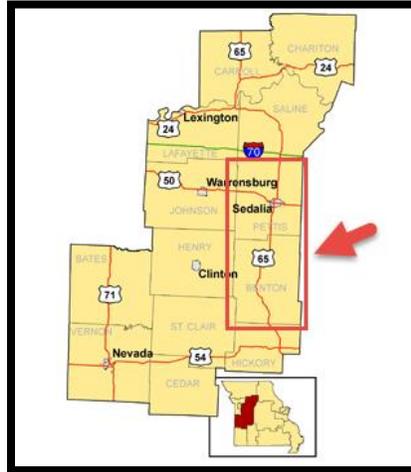

In addition to Bothwell Regional Health Center, Pettis County is served by Katy Trail Community Health, a federally qualified health center, the Pettis County Health Center and several private practice providers. Specialty care available in Sedalia includes cardiology, obstetrics/gynecology, ear/nose/throat, orthopedics, general surgery, neurology, oncology (hematology and radiation), rheumatology, pulmonology, nephrology, pain management, sleep medicine, urology and podiatry. Several privately owned therapy/rehab treatment centers are available as well as a private diagnostic center.

Bothwell Health Center-Truman Lake in Benton County offers primary care, therapy, women's health and radiology services. The Benton County-Warsaw area is also served by Katy Trail Community Health, Golden Valley Memorial Healthcare's primary care clinic and the Benton County Health Department.

## Occupations by Projected Growth

The Missouri Department of Economic Development identifies the area shown below as the west central region of Missouri. Economic data is gathered to gain insight and provide key information necessary to understand the economic status of the region. Community members, employers and policy makers can use this information to identify gaps and address them as needed to ensure economic stability. Top industries are retail trade, farming, construction, food services and federal/military.

### West Central Region

Source: Missouri Economic Research and Information Center

## West Central Region Top Openings

2016-2026

The West Central region is projected to have over 148,000 total job openings between 2016 and 2026. Total openings comprise growth openings, exit openings, and transfer openings. Growth openings are the result of an occupation growing between the base year and the projected year. Exit openings occur when a worker leaves the workforce entirely, such as retirement. Transfer openings occur when a worker leaves their occupation for a different one.

Of the top 20 occupations with the most total openings, 4 are in the *Office and Administrative Support* major occupation group. The occupations of *Supervisors of Retail Sales Workers, Elementary School Teachers and Secondary School Teachers* have large numbers of projected total openings, as well as having average wages that are higher than the average wage for all occupations in the West Central region.

Occupation	2016 Estimated Employment	2026 Projected Employment	Exit Openings	Transfer Openings	Growth Openings	Total Openings	Average Annual Wage
Cashiers	3,217	3,493	3,150	3,074	276	6,500	\$19,401

## Primary Research Process

### Public Survey

To gather primary data from the market area, a survey instrument for quantitative data and multiple focus groups for qualitative data was employed.

### Survey Layout and Design

The Community Health Needs Assessment Survey was a questionnaire-style survey based on a template provided by the Missouri Hospital Association. The 66-question survey had three sections: (1) health behaviors, (2) medical care and services, and (3) demographics. With one exception, all were multiple choice questions. One open-ended question, “What health or community services should Bothwell Regional Health Center provide that are currently not available?” was used to identify gaps in services. The demographic section was placed at the end of the survey to head off any barriers respondents may have felt when answering questions about income, age and insurance status.

## Methodology

The survey was available online at brhc.org, and paper copies were widely distributed throughout Pettis and Benton counties. The survey period was May 1 to June 7, 2019. To incentivize participation, respondents were entered into a drawing for a \$100 Visa gift card. The goal was to collect enough completed surveys to be statistically significant for the combined population of both counties (62,000) with a five percent margin of error. This meant at least 382 completed surveys were needed; a total of 585 were received. Paper surveys were entered into the same online survey service used to collect online responses to easily analyze results. The survey was translated into Spanish and Russian and paper copies provided upon request. Paper surveys were distributed to the following locations:

- Benton County Health Department
- Bothwell Regional Health Center
- Bothwell Azan Clinic
- Bothwell Cole Camp Clinic
- Bothwell Diagnostic Center
- Bothwell ENT
- Bothwell Family Health
- Bothwell Family Medicine Associates
- Bothwell Health Center — Truman Lake
- Bothwell Internal Medicine
- Bothwell Internal Medicine Specialists
- Bothwell OB/GYN
- Bothwell Orthopedics and Sports Medicine
- Bothwell Pain Clinic
- Bothwell PEAK Sport and Spine
- Bothwell Sleep Centers
- Bothwell Urology Services
- Bothwell Walk In Clinic
- Bothwell Wound Healing Center
- Katy Trail Community Health
- Pettis County Health Center
- Pettis County Community Partnership
- Sedalia Housing Authority
- Sedalia Senior Center
- Warsaw Senior Center

The following tactics were employed to promote awareness and encourage participation in the survey:

- Articles in area newspapers
- Slider image on the Bothwell website home page
- Flyers promoting the \$100 gift card drawing posted at all distribution locations
- Email promoting and sharing the survey link to all Bothwell employees
- Email newsletter from the Sedalia Chambers of Commerce
- Social media promotions

## Primary Research Data

		Primary data combined	Secondary Data

### Summary of Key Findings

Key findings reveal that Pettis and Benton counties share many commonalities. When it comes to race description, both counties have a higher white population compared to the state and nation. Pettis County has a significantly higher Hispanic or Latino population compared to Benton County and Missouri. Primary data are an important part of community health

assessment. These data can fill in gaps in secondary data sources, highlight critical issues or concerns, and provide opportunities for community members to actively engage in the community health assessment process.

Survey results further reveal the top pressing health issues in their community are ability to pay for care, illegal drug abuse, lack of health insurance, obesity in adults and mental health. When asked about a preference on health education focus, the top responses were drug and alcohol abuse, diet and exercise, stress management and smoking prevention. Most of these findings are similar to the findings of the 2016 community health needs assessment.

Results from the most recently completed community health assessment survey show that 37.91 percent of the respondents mentioned being told by a physician they have high blood pressure. On the same note, 38.49 percent were told to consider losing weight for health reasons.

<b>Have you ever been told by a doctor you had high blood pressure?</b>		
	<b>Percent</b>	<b>Count</b>
<b>Yes</b>	37.91%	221
<b>No</b>	62.09%	362

<b>Have you ever been told by a doctor you should lose weight for health reasons?</b>		
	<b>Percent</b>	<b>Count</b>
<b>Yes</b>	38.49%	224
<b>No</b>	61.51%	358

Of the 582 survey respondents on health behaviors, 63.67 percent stated they were trying to lose weight compared to 36.33 percent who were not. Results further reveal that of the 452 respondents to the question on whether they had participated in any physical activity in the last 30 days, only 82.30 percent said “yes” compared to 17.70 percent who responded “no.”

<b>Are you currently trying to lose weight?</b>		
	<b>Percent</b>	<b>Count</b>
<b>Yes</b>	63.67%	368
<b>No</b>	36.33%	210

<b>During the past month have you participated in any physical activities?</b>		
	<b>Percent</b>	<b>Count</b>
<b>Yes</b>	82.30%	479
<b>No</b>	17.70%	103

When asked if they had smoked more than 100 cigarettes in their life, 37.61 percent of the 577 respondents answered “yes,” while 62.39 percent replied “no.” On the same note, 11.13 percent responded they still smoke, while 88.87 percent responded that they no longer did.

<b>Have you smoked more than 100 cigarettes in your life?</b>		
	<b>Percent</b>	<b>Count</b>
Yes	37.61%	217
No	62.39%	360

<b>Do you smoke now?</b>		
	<b>Percent</b>	<b>Count</b>
Yes	11.13%	64
No	88.87%	511

According to the most current survey results, 23.13 percent of respondents reported they were told by their doctor they had high cholesterol; 28.87 percent were told they had hypertension. Diabetes, at 12.17 percent, was the third most diagnosed condition followed by adult asthma at 8.52 percent, cancer at 6.43 percent and coronary artery disease at 3.13 percent.

<b>Have you ever been told by the doctor that you have one of the following conditions?</b>		
	<b>Percent</b>	<b>Count</b>
Adult asthma	8.52%	49
Angina or coronary artery disease	3.13%	18
Bacterial pneumonia	2.26%	13
CHF (congestive heart failure)	1.39%	8
Diabetes or high blood sugar	12.17%	70
Heart attack	1.04%	6
Stroke	1.04%	6
High cholesterol	23.13%	133
Hypertension	28.87%	166
COPD	2.26%	13
Cancer	6.43%	37
None	48.87%	281

### **Medical Care and Services**

Of the 568 respondents answering whether they had visited a doctor for a routine checkup within the past year, 79.58 percent reported they had done so. On the same note, 9.51 percent reported they had visited a doctor for a routine checkup within the last two years, 3.87 percent within the past five years, 4.75 percent over five years, and finally 2.29 percent reported that they had never seen a doctor for a routine checkup.

<b>How long has it been since you last visited a doctor for a routine checkup?</b>		
	<b>Percent</b>	<b>Count</b>
Within past year	79.58%	452
Within two years	9.51%	54
Within past five years	3.87%	22
Five or more years	4.75%	27
Never	2.29%	13

When asked about access to a dentist, 90.27 percent of the 565 respondents indicated they have a dentist; 9.73 percent did not.

<b>Do you have a dentist you can see?</b>		
	<b>Percent</b>	<b>Count</b>
Yes	90.27%	510
No	9.73%	55

The table below shows the percent of the respondents who said they had difficulty finding a specialist. Of those specialists, nearly 12.93 percent were seeking bone and joint, 9.48 percent diabetes, 13.73 percent mental health and 8.62 percent women’s health.

<b>If difficulty finding a specialist, what kind were you seeking?</b>		
	<b>Percent</b>	<b>Count</b>
Bone and joint specialist	12.93%	15
Cancer specialist	2.59%	3
Children’s specialist	12.93%	15
Dentist	3.45%	4
Diabetes specialist	9.48%	11
Heart specialist	6.90%	8
Lung and breathing specialist	2.59%	3
Mental health specialist	13.79%	16
Nerve and brain specialist	7.76%	9

<b>If difficulty finding a specialist, what kind were you seeking?</b>		
Women’s health specialist	8.62%	10
Other (please specify)	50.86%	59

Asked about access to a substance abuse counselor, 74.69 percent answered “no” while 25.31 percent answered “yes.” On the same note, when asked if they had a mental health specialist they can see, 59.82 percent replied “no” and 40.18 percent answered “yes.”

<b>Do you have a substance abuse counselor you can see?</b>		
	<b>Percent</b>	<b>Count</b>
Yes	25.31%	143
No	74.69%	422

<b>Do you have a mental health specialist you can see?</b>		
	<b>Percent</b>	<b>Count</b>
Yes	40.18%	227
No	59.82%	338

As outlined in the following table, the top three reasons why people reported they had difficulty finding a doctor was due to the doctor not taking new patients at 53.73 percent, not accepting insurance and unable to get a convenient appointment both at 20.90 percent.

<b>Following are reasons why people reported that they or a member of their household had difficulty finding a doctor within the past two years?</b>		
	<b>Percent</b>	<b>Count</b>
Couldn’t get a convenient appointment.	20.90%	14
Didn’t know how to get in contact with one.	4.48%	3
Doctor was not taking new patients.	53.73%	36
No transportation.	1.49%	1
Would not accept insurance.	20.90%	14
Other (please specify).	38.81%	26

The table below shows the responses regarding medical services most needed in their community. A majority reported counseling/mental health services as the area of greatest need at 55.99 percent, followed by alcohol and drug treatment at 48.82 percent and adult primary care services at 39.38 percent.

<b>What medical services are most needed in your community?</b>		
	<b>Percent</b>	<b>Count</b>
Adult primary care services	39.38%	217
Alcohol and drug abuse treatment	48.82%	269
Cancer treatment	11.98%	66
Counseling/mental health services	55.99%	308
Diabetes care	17.60%	97
Emergency/trauma care	15.43%	85
Heart care services	15.43%	85
Orthopedic care (bone and joint)	9.80%	54
Pediatric services	18.51%	102
Women's services (obstetrics/gynecological services)	16.88%	93
Other (please specify)	10.16%	56

As shown, top five responses received regarding the most pressing issue in their community are outlined as ability to pay for care, drug abuse/illegal substances, cost of health care, lack of health insurance and obesity in adults.

<b>What do you think are the most pressing health problems in your community?</b>		
Ability to pay for care	65.34%	360
Alcohol — dependency or abuse	33.21%	183
Alcohol — underage binge or abuse	17.42%	96
Drug abuse — prescription medications	47.37%	261
Drug abuse — illegal substances	60.80%	335
Cancer	25.05%	138
Child abuse	14.88%	82
Cost of health care	50.45%	278
Domestic violence	16.33%	90
Heart Disease	19.06%	105

<b>What do you think are the most pressing health problems in your community?</b>		
Lack of health insurance	50.45%	278
Lack of transportation to health care services	22.14%	122
Lack of dental care	22.14%	122
Lack of physical activity	35.57%	196
Lack of prenatal care	5.81%	32
Mental health	47.19%	260
Obesity in adults	48.28%	266
Obesity in children and teenagers	36.66%	202
Prescription medication too expensive	41.92%	231
Teen pregnancy	17.60%	97
Tobacco use/smoking among adults	33.39%	184
Tobacco use/smoking among teenagers	28.68%	158

The table below reflects the top three health education services needed per survey responses received. Drug abuse ranked number one at 61.16 percent, diet and/or exercise second at 45.55 percent, and alcohol abuse third at 42.65 percent.

<b>Please select the type(s) of health education services most needed in your community?</b>		
	<b>Percent</b>	<b>Count</b>
Diet and/or exercise	45.55%	251
Stress management	42.29%	233
Drug abuse	61.16%	337
Smoking prevention and/or quitting	40.65%	224
Cancer screening	26.13%	144
Alcohol abuse	42.65%	235
Diabetes	29.22%	161
Child abuse/family violence	30.13%	166
Alzheimer's disease	20.69%	114
Sexually transmitted diseases	22.69%	125

<b>Please select the type(s) of health education services most needed in your community?</b>		
Asthma	8.89%	49
HIV/AIDS	10.34%	57

**2019 Focus Group Summary**

As part of the Community Health Needs Assessment, two focus groups (one in Pettis County and one in Benton County) were held to gather insight on health information and perceptions from a variety of professionals in the community. Each focus group was asked the same base questions that focused on identifying general health issues, barriers the county and community face in overcoming the issues, and potential strategies to overcome the barriers identified. Although both counties have unique health issues, there were social issues that overlapped between Pettis and Benton counties, primarily the poverty level of the two counties. These social issues stem from community needs and impact overall health of the communities. Bothwell’s role in both counties is to provide health care options along with health partners to better the communities which they serve. Detailed summaries from each focus group are included below.

**Pettis County**

Pettis County focus group members were influential individuals from essential community organizations and businesses. Health care administration and leadership members represented Bothwell Regional Health Center, Crossroads Hospice and the Pettis County Health Center. In addition to health care representatives, the focus group included participants from city and community partners including Care Connection for Aging - Sedalia Senior Center, City of Sedalia, State Fair Community College, the Sedalia Police Department and Tyson Foods. Members were selected to participate based on their organization’s role in the community. Katy Trail Community Health’s representative was unable to participate in either focus group, however, insight was provided via one-on-one communication. The other community health care provider chose not to participate.

Many specific health issues were identified as the biggest challenges in the community; many tied back to a social issue. The top health issues identified were lack of knowledge and access to available resources, lack of immunizations and mental health services, illegal and prescription substance abuse, and the poverty level of the community which affects overall health of the community. Other issues that were discussed included chronic diseases such as diabetes and obesity and primary care providers nearing retirement. The group discussed at length how the poverty level of the community drives many of the health issues.

Citizens lack knowledge and access to the many different services and organizations that help provide resources to the community. Applying for assistance is difficult for some due to

transportation issues, language barriers, reading levels, or not meeting basic requirements such as a permanent address which is required when applying for some government assistance. Due to lack of access to adequate housing options many lower income families deal with unstable housing. The cost of living to provide a stable, safe and clean environment for many is not obtainable even with a steady paycheck. Unstable housing conditions take a toll on both the physical and mental health of the family. The nutrition of the family suffers due to the lack of income available for the cost of food. It was discussed that school faculty and staff see the poverty first-hand as the meals provided there are the only nutritional meal available to children. Health issues arise without proper nutrition, and treatment is delayed due to the cost of health care.

The immunization percentage continues to decline in Pettis County as second-generation immigrants and other parents choose not to immunize their children. Although parents have the right to refuse immunizations based on religious or medical exemptions, many make their decisions based on false information circulated in society. The decline of immunized children in the public school system puts the community at risk for an outbreak of a variety of preventable diseases.

Mental health and substance abuse were also topics of debate. Currently there is a lack of resources available in the community to diagnose and treat mental illness. It often takes multiple days to find and place patients in appropriate settings to receive the required care. Due to the lengthy process, some resort to self-medicating which in turn results in substance abuse. Illegal and prescription drug abuse go hand in hand as there are a handful of addicts that had a legitimate injury and were prescribed medication. Once the injury is healed and the individual no longer has access to the medication, some resort to heroin. Heroin addiction is prevalent in the community and is a constant concern for community leaders.

Implementation strategies discussed to combat the identified issues included various mentorship and community worker programs that would help individuals learn more about available resources and help them sign up for those resources. Another approach is to synergize community efforts in tackling the substance abuse issue as many organizations are working on potential solutions, but it will take the entire community to implement. A single location, like a community center, could aid in offering services, education and health checks for the public rather than individuals having to visit multiple locations. The largest barriers to implementation are time and funding; organizations are limited by the available dollars in the community.

Bothwell is making strides to help the community by offering a few different programs. One of the programs includes Wellness Works — a program that will help occupational health coordinate with employees concerning insurance benefits. This in turn helps keep employees healthy and able to work. Another service being implemented is a centralized call center for Bothwell entities that should help ease the access to health care for patients. Eventually, this center could potentially act as a community health resource by incorporating other health partners.

## **Benton County**

Benton County focus group members were individuals from essential community organizations and businesses. Health care administration and leadership members represented Bothwell Regional Health Center and the Benton County Health Coalition. In addition to health care representatives, the focus group included participants from city and community partners including Benton County Care Connection for Aging and the Benton County Ambulance District. A representative from the Sedalia School District unable to attend the Pettis County discussion was also in attendance.

Many community health issues were identified including a lack of transportation, low literacy levels, children on Medicaid, poor nutrition for seniors and hospital readmissions. These are all related to two core issues: an aging population and the poverty/education level of the community. Although substance abuse is a concern, it was not identified as a key challenge.

The Benton County aging population has a difficult time accessing proper health care. Although options are available in the community, a lack of specialists and the constant turnover of physicians worsen the issue. Many seniors prefer to see the same physician and are uncomfortable with change. In addition to primary care provider changes, when transitioned back to the area from a larger health institution, seniors sometimes get “lost” in the system if they do not have a primary care provider listed. This leads to higher hospital readmissions as proper medication intake and treatment follow up are not monitored by a provider.

The poverty and education level in the county are low and affect the health of the community. A lack of transportation impacts the individual’s access to proper health care and nutrition. Meals are provided by a program through the Benton County Care Connection for Aging organization. Without home delivered meals one-third of the elderly population would be without food. Literacy is an issue among the population, making applying for available aid difficult. Although many applications for assistance are available online, a lack of in-home internet contributes to the access boundaries faced by the community.

Children who are on Medicaid are not seen on a regular basis, leading to health issues going undiagnosed. Children who would qualify for Medicaid are not being enrolled in part because many are in short-term care with grandparents and/or foster care while parents are “temporarily out of the picture” and don’t want to fill out the paperwork. Lack of transportation compounds the issue. Benton County has a higher immunization percentage because the older caregivers are firm believers in immunizations.

Implementation strategies discussed to combat the identified issues included working together to implement systems to help seniors continue their treatment when transferred back into the community from larger health systems, continuing to recruit physicians who want to practice in rural health, and encouraging Medicaid enrollment for children to ensure yearly appointments. The biggest issue facing implementation is the financial responsibilities of parties involved. It is hard to provide transportation and services when limited funds are available.

Bothwell is working to provide access to better health care by bringing additional specialties to the area and helping patients complete forms for disability and Medicaid while still in the hospital. Swing beds at the hospital also allow patients to transfer from larger health systems to Bothwell to continue their care closer to home, thus making follow up with primary care providers easier to coordinate.

### Focus Group Participants

<b>Name</b>	<b>Position</b>	<b>Organization</b>
Amber Allain	Director of Clinic Operations	Bothwell Family Health, Internal Medicine and Walk In Clinic
Melissa Guffin	Corporate Health Consultant	Bothwell Regional Health Center
Kara Sheeley	Director of Oncology Services	Bothwell Regional Health Center
Steve Davis	Chief Financial Officer	Bothwell Regional Health Center
Rose McMullin	Chief Nursing Officer	Bothwell Regional Health Center
Sherri Egbert	Emergency Department Nursing Director	Bothwell Regional Health Center
Deb Kriger	Regional Services Director	Care Connection for Aging - Sedalia Senior Center
Kelvin Shaw	City Administrator	City of Sedalia
Micah Waddle	WIC Director	Pettis County Health Center
Kyle Meyer	WIC Intern	Pettis County Health Center
Lynn Parkhurst	Physician Liaison	Crossroads Hospice and Palliative Care
Casey Smith	Nurse Health Coordinator	Sedalia 200 Sedalia District
Allison Brosch	ADN Program Director	State Fair Community College
JoAnn Martin	Administrator	Pettis County Health Center
Chris Traffanstedt	Chaplain Services	Tyson Foods
Larry Ward	Commander	Sedalia Police Department
Hannah Sartin	Account Executive	Callis
Megan Hartman	Client Services Director	Callis
Cliff Callis	President	Callis
Chris McCune	Administrator	Benton County Care Connection for Aging Services
Marilyn Johnson	Director of Clinic Operations	Bothwell Truman Lake and Bothwell Cole Camp
Linda Viebrock	Administrator	Benton County Health Coalition
Barry Pabst		Benton County Health Department
Erica Crawford		Benton County Health Department

Name	Position	Organization
Nathan Burton	Administrator	Benton County Ambulance District
Chris Stewart	CEO	Katy Trail Community Health

Representatives from the following organizations were invited but unable to attend:

- AFC Urgent Care
- Amigos de Cristo, Spanish Lutheran Ministry
- Benton County Commission
- Benton County Enterprise
- Bothwell OB/GYN
- City of Sedalia Mayor’s Office
- Open Door Service Center
- Pettis County Sheriff Office
- Pettis County Administrator Office
- Pettis County Ambulance District
- Pettis County Community Partnership

**Opportunities**

As demonstrated by the county health rankings, roadmaps and other data sources used in the development of this report, the following areas are potential opportunities for community health improvement in Benton and Pettis counties.

- Diabetes
- Heart disease
- Mental health issues
- Substance abuse
- Obesity
- Higher percent of individuals with high blood pressure, cholesterol, and asthma
- High percentage of adults who are current smokers
- Percentage of the adult population (age 20 and older) that reports a body mass index (BMI) greater than or equal to 30 kg/m2
- Higher percent of population with adequate access to locations for physical activity
- Higher percentage of population under age 65 without health insurance
- Higher ratio of population to primary care physicians
- Benton County has low percentage of fee-for-service Medicare enrollees that had an annual flu vaccination
- Lower percentage of adults ages 25-44 with some post-secondary education
- Higher percentage of population ages 16 and older unemployed but seeking work
- Higher number of reported violent crime offenses per 100,000 population
- Higher number of deaths due to injury per 100,000 population
- Higher teen births

- Higher percent of children in poverty
- Higher percent of severe housing problems
- Lack of transportation, poor nutrition for seniors and hospital readmissions

### **Strengths**

The following community health strengths in Benton and Pettis counties have been identified based on the data sources; rates have been compared to the state.

- Lower percentage of adults reporting binge or heavy drinking
- Lower rate of low birth weight babies
- Lower sexually transmitted infections
- Lower rate of hospital stays for ambulatory-care sensitive conditions per 100,000 Medicare enrollees
- Pettis County has a higher percentage of ninth-grade cohort that graduates in four years.
- Pettis County has higher percentage of fee-for-service Medicare enrollees that had an annual flu vaccination.
- Pettis County has a higher ratio of household income at the 80th percentile to income at the 20th percentile.

### **Secondary Research Process**

Secondary data derived from various local, state and national data sources was reviewed and analyzed. Findings will be key in helping to identify the gaps needing attention in these communities. Data from the U.S. Census, exploreMOhealth, Missouri Department of Health and Senior Services-Missouri Information for Community Assessment, Community Commons, Centers for Disease Control and Prevention and the University of Wisconsin's Robert Wood Johnson Foundation County Health Rankings are a few examples of secondary data sources that were used in this process. Data from the primary service areas will be benchmarked against state and national data whenever possible to identify emerging trends. Findings from these results will be the basis for any decision-making and will ensure that resources will be allocated where they are needed most.

The following secondary data sources were used in the analysis:

- Bureau of Labor Statistics and the Division of Occupational Employment Centers for Disease Control and Prevention, Behavioral Risk Factor Surveillance System
- Centers for Disease Control and Prevention, National Vital Statistics
- Federal Bureau of Investigation, FBI Uniform Crime Reports
- Feeding America
- Missouri Department of Elementary and Secondary Education
- Missouri Department of Health and Senior Services, Missouri County-Level Study
- Missouri Department of Mental Health
- Missouri Department of Social Services
- Missouri Division of Behavioral Health, Substance Abuse and Mental Health Services Administration
- Missouri Economic Research and Information Center
- National Archive of Criminal Justice Data
- National Center for Education Statistics, NCES - Common Core of Data
- Pennsylvania State University, College of Agricultural Sciences, Northeast Regional Center for Rural Development
- University of Missouri, Center for Applied Research and Environmental Systems
- University of Wisconsin's Robert Wood Johnson Foundation County Health Rankings
- US Census Bureau, American Community Survey
- US Census Bureau, Decennial Census
- US Census Bureau, Small Area Health Insurance Estimates
- US Census Bureau, Small Area Income and Poverty Estimates
- US Department of Education, EDFacts
- US Department of Health and Human Services, Administration for Children and Families
- US Department of Health and Human Services, Health Indicators Warehouse
- US Department of Labor, Bureau of Labor Statistics

### **Secondary Research Data**

Secondary data findings revealed Pettis County has over twice the total population compared to Benton County. Both of these counties have a significantly lower percent of blacks and Asians compared to the state and national trends. A review of the total population by ethnicity shows Pettis County has a substantially higher rate compared to Benton County and Missouri. Select health factors per the exploreMOhealth spotlight on ZIP health report reveals that Benton County has a higher prevalence rate of depressive disorder, COPD, diabetes, asthma, cancer and angina or coronary heart disease compared to Pettis County and the state. While Pettis County is trending lower than Benton County on all of the aforementioned measures, it is trending higher than the state on COPD.

A careful review of the social and economic factors of population with no high school diploma shows Pettis County has a slightly higher percent population age 25 and above with no high school diploma compared to Benton County. The population over 25 years with no high school diploma by gender in both counties, state and nation is higher than that of females across the board. According to the national center for education statistics database, Pettis County has a substantially higher on-time graduation rate than Benton County, Missouri and the nation. While Pettis County has a slightly higher percent population age 25 and above with a bachelor's degree or higher compared to Benton County, both of these counties have a significantly lower percent compared to the state and nation. This particular indicator is important because studies have shown that people with more education live longer, healthier lives than those with fewer years of schooling.

Education is important not only for higher paying jobs and economic productivity, but also for saving lives and cost savings. Both Pettis and Benton counties have a significantly higher percent of students eligible for free or reduced price lunch compared to the state and nation. It is also evident that the percent of children eligible for free lunch alone has increased significantly from 2010 to 2017. While Pettis County has a slightly higher average and median household income compared to Benton County, both of these counties have a substantially lower average and median household income compared to the state and nation. According to the five-year American Community Survey estimates, both counties have a lower average and median family income compared to the state and nation.

When it comes to the per capita income by race alone, white fair better in Pettis compared to Benton County while black or African Americans in Benton County fair better on the same measure compared to Pettis County. While Pettis County has a higher percent of families earning over \$75,000 annually compared to Benton County, both lag behind the state and nation. Compared to the state and nation, both counties have a slightly higher percent of individuals living in households with income below the 100 percent Federal Poverty Level. Evidently, a drill down of this data by ethnicity further reveals that the percent Hispanic/Latino living in poverty is higher than the non-Hispanic/Latino population in both jurisdictions. A review of this data by race alone further shows that black or African Americans have a higher percent of population living in poverty compared to white in both counties. Both of these counties have a slightly higher percent of children living below the 100 percent FPL compared to the state and nation. A review of this indicator by race alone reveals that a higher percent of black or African American children are living in poverty compared to white.

Benton County has a higher unemployment rate compared to Pettis County, state and the nation. The combined average annual unemployment rate for both of these counties has decreased consistently from 2010 to 2017. Benton County has a higher percent of households where housing costs exceed 30 percent of total household income compared to Pettis County. Compared to the nation, both of these counties have a lower percentage of households with no motor vehicle. A further review of this measure shows that there is a higher percentage of renter occupied households with no motor vehicle compared to owner occupied households in both counties, state and nation.

While Pettis County has a slightly higher percent of uninsured population compared to Benton County, both have a higher rate compared to the state and nation. The uninsured population by ethnicity alone shows the percent Hispanic/Latino is higher than non-Hispanic/Latino in both counties, state and nation. A drill down by race reveals non-Hispanic whites have the lowest percent of uninsured population compared to black or African Americans, native American/Alaskan natives, native Hawaiian/Pacific Islanders, and other races across the counties, state and nation. Both counties have a higher rate of uninsured children compared to the state and nation. They also have a higher percent of insured population receiving Medicaid.

Compared to the state, both counties had a lower percent of its population reporting food insecurity per the most recent data derived from the Feeding America database. Benton County reported a higher percent of child food insecurity rate compared to Pettis County. Both counties had an extremely low percent of food insecure children ineligible for assistance compared to the state and nation.

According to the Centers for Disease Control and Prevention, Behavioral Risk Factor Survey System, Pettis had a higher age-adjusted percent of adults aged 18 and older who self-reported lacking social and emotional support compared to Benton County, the state and nation. Both counties had a significantly higher teen birth per 1,000 population. Births to females age 15-19 per 1,000 by race and ethnicity revealed that it was highest among non-Hispanic whites in Benton County compared to Pettis County. While both counties had fewer violent crime rates per 100,000 population compared to the state and nation, Benton County had a higher rate compared to Pettis County.

A review of Missouri Department of Health and Senior Services County Level Study data reveals that a higher percent respondents reported their health was in fair or poor status in Benton County compared to Pettis County. Residents in Benton County reported a higher average of poor mental health days per month and average activity limitation days compared to Pettis County. A higher percent of respondents to the CLS survey indicated they could not get needed dental care in Pettis County compared to Benton County. While Pettis County had a higher percent of individuals who reported they did not get the required medical care overall, a higher percent reported it was due to cost and transportation in Benton County. Comparing the two counties, Benton County had a higher percent of respondents who reported smoking cigarettes every day, smokeless tobacco use, electronic cigarettes, and attempts to quit cigarette smoking. A higher percent of respondents of the CLS survey revealed they have not had their blood cholesterol checked in Pettis County. A higher percent of Benton County respondents revealed they have never had mammograms and recent flu vaccination.

Compared to Pettis County, Benton County reported a higher percent of individuals with high blood pressure, high cholesterol among age 35 and older, reported heart attack, angina or coronary heart disease, asthma, diabetes, cancer, COPD, emphysema or chronic bronchitis, arthritis, depressive disorder and kidney disease. Compared to Benton, a higher percent of Pettis County respondents stated they have sidewalks in their neighborhoods, roads and streets

with shoulders or marked lanes for bicycling in their community, ease in purchasing healthy food in their neighborhood, less exposure to secondhand smoke at work, and a higher percent of individuals that would support a state law supporting smoke free workplace.

The results of this secondary data analysis show Pettis and Benton counties have similar issues warranting a collaborative, well-coordinated, multifaceted approach to address the common problems together. They also share similar demographics, socioeconomic factors, chronic disease, leading causes of death, preventable hospitalizations, substance abuse, infectious diseases, maternal and child health factors, among other factors considered in this analysis. Sharing these results with them and looking for areas of collaboration will help address the underlying problems required to ensure healthy communities. Reviewing the secondary data closely and capturing the missing elements in the primary data collection process will assist Bothwell Regional Health Center and the community at large identify opportunities and current gaps to be addressed. Identifying the key partners that should be engaged earlier in the process will be critical in ensuring a successful prioritization and implementation of the Community Health Needs Assessment.

The following data from the exploreMOhealth.org database was used to aggregate secondary data analysis to identify which health outcomes and health factors are most important in Pettis and Benton counties. It was extremely important in helping to generate this customized Community Health Needs Assessment using county- and ZIP-level data on demographics, socioeconomic status, risk factors, preventive practices, health conditions and environment. With the changing landscape in health care, new population health strategies are refocusing health care delivery. The traditional delivery model has centered on hospital or physician's office care. However, to understand why poor emotional or physical health occurs in some communities, health care providers are looking upstream to the numerous factors that lead to positive or negative health outcomes. These factors include social, environmental and contextual determinants. These are community factors that create an intersection of traditional health care and public health.

## Demographics

### Total Population

A total of 61,227 people live in the 1,386.27 square mile report area defined for this assessment according to the U.S. Census Bureau American Community Survey 2013-17 5-year estimates. The population density for this area, estimated at 44.17 persons per square mile, is less than the national average population density of 90.88 persons per square mile.

## Change in Total Population

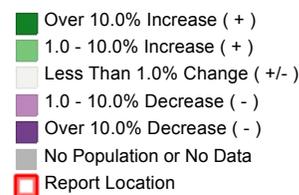

According to the United States Census Bureau Decennial Census, between 2000 and 2010 the population in the report area grew by 4,674 persons, a change of 8.26%. A significant positive or negative shift in total population over time impacts healthcare providers and the utilization of community resources.

### Families with Children

According to the most recent the American Community Survey estimates, 28.38% of all occupied households in the report area are family households with one or more child(ren) under the age of 18. As defined by the US Census Bureau, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption. A non-family household is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

### Population Under Age 18

An estimated 22.73% of the population in the report area is under the age of 18 according to the U.S. Census Bureau American Community Survey 2013-17 5-year estimates. An estimated total of 13,918 youths resided in the area during this time period. The number of persons under age 18 is relevant because this population has unique health needs which should be considered separately from other age groups.

### Population Age 25-34

This indicator reports the percentage of youth aged 25-34 in the designated geographic area. This indicator is relevant because it is important to understand the percentage of youth in the community, as this population has unique health needs which should be considered separately from other age groups.

### Population in Limited English Households

This indicator reports the percentage of the population aged 5 and older living in Limited English speaking households. A "Limited English speaking household" is one in which no member 14 years old and over (1) speaks only English at home or (2) speaks a language other than English at home and speaks English "Very well." This indicator is significant as it identifies households and populations that may need English-language assistance.

### Population with Limited English Proficiency

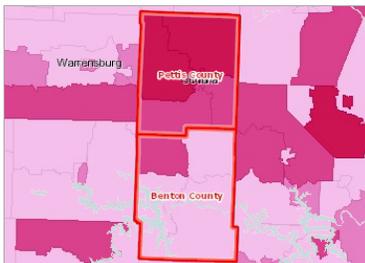

This indicator reports the percentage of the population aged 5 and older who speak a language other than English at home and speak English less than "very well." This indicator is relevant because an inability to speak English well creates barriers to healthcare access, provider communications, and health literacy/education.

Report Area	Population Age 5+	Population Age 5+ with Limited English Proficiency	Percent Population Age 5+ with Limited English Proficiency

### Population Geographic Mobility

This indicator reports information about population in-migration by assessing changes in residence within a one year period. Of the 60,606 persons residing in the report area, an estimated 7.29% relocated to the area, according to the latest American Community Survey 5-year estimates. Persons who moved to a new household from outside of their current county of residence, from outside their state of residence, or from abroad are considered part of the in-migrated population. Persons who moved to a new household from a different household within their current county of residence are not included.

### Foreign-Born Population

This indicator reports the percentage of the population that is foreign-born. The foreign-born population includes anyone who was not a U.S. citizen or a U.S. national at birth. This includes any non-citizens, as well as persons born outside of the U.S. who have become naturalized citizens. The native U.S. population includes any person born in the United States, Puerto Rico, a U.S. Island Area (such as Guam), or abroad of American (U.S. citizen) parent or parents. The latest figures from the U.S. Census Bureau show that 2,762 persons in the report area are of foreign birth, which represents 4.51% of the report area population. This percentage is less than the national rate of 13.18%.

Report Area	Total Population	Naturalized U.S. Citizens	Population Without U.S. Citizenship	Total Foreign-Birth Population	Foreign-Birth Population, Percent of Total Population
Report Location	61,227	834	1,928	2,762	4.51%

**Foreign-Born Population (Non-Citizen or Naturalized), Percent by Tract, ACS 2013-17**

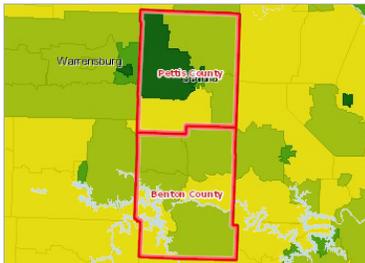

## Hispanic Population

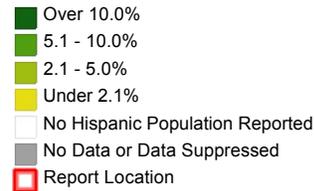

The estimated population that is of Hispanic, Latino, or Spanish origin in the report area is 3,984. This represents 6.51% of the total report area population, which is less than the national 17.6% rate. Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. People who identify their origin as Hispanic, Latino, or Spanish may be of any race.

### Urban and Rural Population

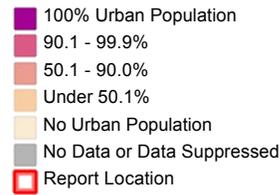

This indicator reports the percentage of population living in urban and rural areas. Urban areas are identified using population density, count, and size thresholds. Urban areas also include territory with a high degree of impervious surface (development). Rural areas are all areas that are not urban.

Report Area	Total Population	Urban Population	Rural Population	Percent Urban	Percent Rural
Report Location	61,257	28,823	32,434	47.05%	52.95%

## Social & Economic Factors

### Population with No High School Diploma

Within the report area there are 6,818 persons aged 25 and older without a high school diploma (or equivalency) or higher. This represents 15.99% of the total population aged 25 and older. This indicator is relevant because educational attainment is linked to positive health outcomes (Freudenberg & Ruglis, 2007).

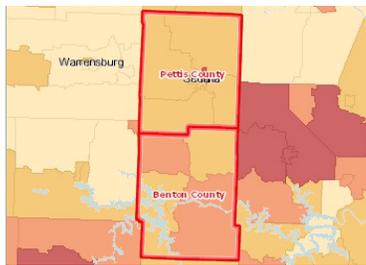

Report Area	Total Population Age 25+	Population Age 25+ with No High School Diploma	Percent Population Age 25+ with No High School Diploma

### High School Graduation Rate (NCES)

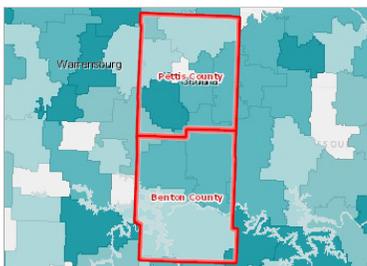

Within the report area 89.3% of students are receiving their high school diploma within four years. This is greater than the Healthy People 2020 target of 82.4%. This indicator is relevant because research suggests education is one the strongest predictors of health (Freudenberg & Ruglis, 2007).

Report Area	Average Freshman Base Enrollment	Estimated Number of Diplomas Issued	On-Time Graduation Rate

United States	81.8%	83.2%	84.3%	84.3%	86.1%	86.8%

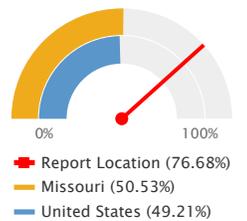

## Children Eligible for Free/Reduced Price Lunch

Within the report area 7,186 public school students or 76.68% are eligible for Free/Reduced Price lunch out of 9,372 total students enrolled. This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs. Additionally, when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

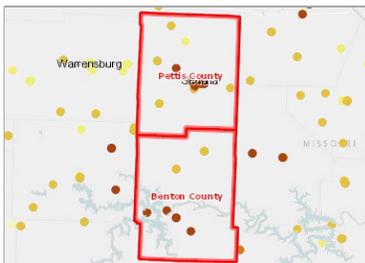

Report Area	Total Students	Number Free/Reduced Price Lunch Eligible	Percent Free/Reduced Price Lunch Eligible
Report Location	9,372	7,186	<b>76.68%</b>
Benton County, MO	2,424	1,933	79.74%

### Student Reading Proficiency (4th Grade)

This indicator reports the percentage of children in grade 4 whose reading skills tested below the "proficient" level for the English Language Arts portion of the state-specific standardized test. This indicator is relevant because an inability to read English well is linked to poverty, unemployment, and barriers to healthcare access, provider communications, and health literacy/education.

Report Area	Total Students with Valid Test Scores	Percentage of Students Scoring 'Proficient' or Better	Percentage of Students Scoring 'Not Proficient' or Worse
Report Location	742	63.48%	<b>36.52%</b>
Missouri	68,351	64.71%	35.29%

### Income - Median Household Income

This indicator reports median household income based on the latest 5-year American Community Survey estimates. This includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income.

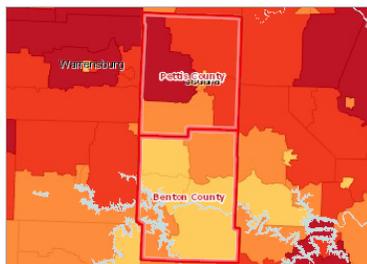

Report Area	Total Households	Average Household Income	Median Household Income
Report Location	24,013	\$52,991.00	No data
Benton County, MO	7,982	\$45,872.00	\$35,097.00

### Income - Families Earning Over \$75,000

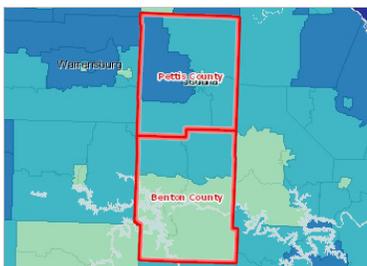

In the report area, 26.92%, or 4,304 families report a total annual income of \$75,000 or greater. Total income includes all reported income from wages and salaries as well as income from self-employment, interest or dividends, public assistance, retirement, and other sources. As defined by the US Census Bureau, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption. A non-family household is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

### Income - Public Assistance Income

This indicator reports the percentage households receiving public assistance income. Public assistance income includes general assistance and Temporary Assistance to Needy Families (TANF). Separate payments received for hospital or other medical care (vendor payments) are excluded. This does not include Supplemental Security Income (SSI) or noncash benefits such as Food Stamps.

Report Area	Total Households	Households with Public Assistance Income	Percent Households with Public Assistance Income

### Income - Inequality (GINI Index)

This indicator reports income inequality using the Gini coefficient. Gini index values range between zero and one. A value of one indicates perfect inequality where only one house-hold has any income. A value of zero indicates perfect equality, where all households have equal income. Index values are acquired from the 2013-17 American Community Survey and are not available for custom report areas or multi-county areas.

## Poverty - Population Below 100% FPL

Poverty is considered a *key driver* of health status.

Within the report area 17.66% or 10,581 individuals are living in households with income below the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

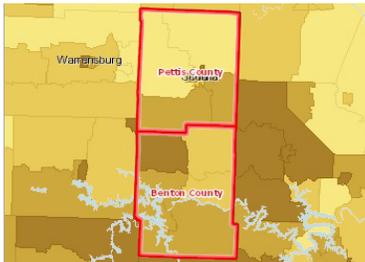

Report Area	Total Population	Population in Poverty	Percent Population in Poverty
Report Location	59,919	10,581	<b>17.66%</b>

## Unemployment Rate

Total unemployment in the report area for the current month was 978, or 3.5% of the civilian non-institutionalized population age 16 and older (non-seasonally adjusted). This indicator is relevant because unemployment creates financial instability and barriers to access including insurance coverage, health services, healthy food, and other necessities that contribute to poor health status.

Report Area	Labor Force	Number Employed	Number Unemployed	Unemployment Rate

### Housing Cost Burden (30%)

This indicator reports the percentage of the households where housing costs exceed 30% of total household income. This indicator provides information on the cost of monthly housing expenses for owners and renters. The information offers a measure of housing affordability and excessive shelter costs. The data also serve to aid in the development of housing programs to meet the needs of people at different economic levels.

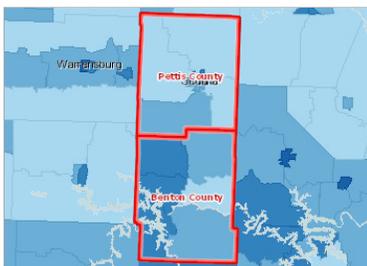

Report Area	Total Households	Cost Burdened Households (Housing Costs Exceed 30% of Income)	Percentage of Cost Burdened Households (Over 30% of Income)
Report Location	24,013	6,138	25.56%

**Cost Burdened Households (Housing Costs Exceed 30% of Household Income), Percent by Tract, ACS 2013-17**

### Cost Burdened Households by Tenure, Total

This data shows the number of households that spend more than 30% of the household income on housing costs. In the report area, there were 6,138 cost burdened households according to the U.S. Census Bureau American Community Survey (ACS) 200-2017 5-year estimates. The data for this indicator is only reported for households where household housing costs and income earned was identified in the American Community Survey.

### Cost Burdened Households by Tenure, Percent

This data shows the percentage of households by tenure that are cost burdened. Cost burdened rental households (those that spent more than 30% of the household income on rental costs) represented 40.38% of all of the rental households in the report area, according to the U.S. Census Bureau American Community Survey (ACS) 2010-2017 5-year estimates. The data for this indicator is only reported for households where tenure, household housing costs, and income earned was identified in the American Community Survey.

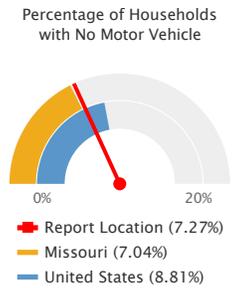

Report Area	Rental Households	Percentage of Rental Households that are Cost Burdened	Owner Occupied Households (With Mortgage)	Percentage of Owner Occupied Households w/ Mortgages that are Cost Burdened	Owner Occupied Households (No Mortgage)	Percentage of Owner Occupied Households w/o Mortgages that are Cost Burdened
Report Location	6,738	40.38%	9,099	27.16%	8,176	11.57%
Benton County, MO	1,487	43.64%	3,114	34.94%	3,381	13.34%
Pettis County, MO	5,251	39.46%	5,985	23.11%	4,795	10.32%
Missouri	788,878	42.35%	996,867	23.87%	600,458	11.32%
United States	42,992,786	46.84%	48,185,314	29.33%	27,647,821	13.78%

### Households with No Motor Vehicle

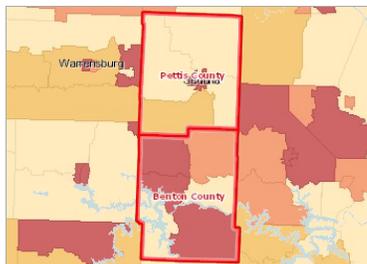

This indicator reports the number and percentage of households with no motor vehicle based on the latest 5-year American Community Survey estimates.

Report Area	Total Occupied Households	Households with No Motor Vehicle	Percentage of Households with No Motor Vehicle
Report Location	24,013	1,746	7.27%
Benton County, MO	7,982	521	6.53%
Pettis County, MO	16,031	1,225	7.64%
Missouri	2,386,203	167,957	7.04%
United States	118,825,921	10,468,418	8.81%

Note: This indicator is compared to the state average.

## Insurance - Uninsured Population

The lack of health insurance is considered a *key driver* of health status.

In the report area 13.11% of the total civilian non-institutionalized population are without health insurance coverage. The rate of uninsured persons in the report area is greater than the state average of 10.43%. This indicator is relevant because lack of insurance is a primary barrier to healthcare access including regular primary care, specialty care, and other health services that contributes to poor health status.

### Insurance - Population Receiving Medicaid

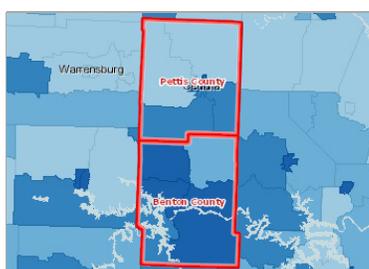

This indicator reports the percentage of the population with insurance enrolled in Medicaid (or other means-tested public health insurance). This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs; when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

Report Area	Total Population (For Whom Insurance Status is Determined)	Population with Any Health Insurance	Population Receiving Medicaid	Percent of Insured Population Receiving Medicaid

United States	73,580,326	17,284,530	23.49%

### Food Insecurity - Food Insecure Population Ineligible for Assistance

This indicator reports the estimated percentage of the total population and the population under age 18 that experienced food insecurity at some point during the report year, but are ineligible for State or Federal nutrition assistance. Food insecurity is the household-level economic and social condition of limited or uncertain access to adequate food. Assistance eligibility is determined based on household income of the food insecure households relative to the maximum income-to-poverty ratio for assistance programs (SNAP, WIC, school meals, CSFP and TEFAP).

Report Area	Food Insecure Population, Total	Percentage of Food Insecure Population Ineligible for Assistance	Food Insecure Children, Total	Percentage of Food Insecure Children Ineligible for Assistance
Report Location	9,500	8%	3,240	4%
Benton County, MO	2,950	7.02%	880	3.98%

United States	48,770,990	29%	17,284,530	31%

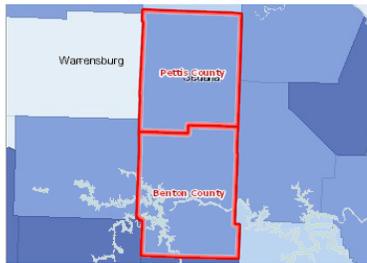

### Racial Diversity (Theil Index)

This indicator measures the spatial distribution or evenness of population demographic groups in neighborhoods throughout the county. This indicator is presented as an index with values ranging between 0 and 1, with higher values indicating higher levels of segregation between neighborhoods.

### Racial Segregation (Interaction Index)

This indicator measures the spatial segregation of population demographic groups. The indicator is presented as an index with values ranging between 0 and 1, with higher values indicating greater levels of segregation. This indicator specifically measures segregation between the White (Non-Hispanic) and Black (Non-Hispanic) population.

### Lack of Social or Emotional Support

This indicator reports the percentage of adults aged 18 and older who self-report that they receive insufficient social and emotional support all or most of the time. This indicator is relevant because social and emotional support is critical for navigating the challenges of daily life as well as for good mental health. Social and emotional support is also linked to educational achievement and economic stability.

Report Area	Total Population Age 18+	Estimated Population Without Adequate Social / Emotional Support	Crude Percentage	Age-Adjusted Percentage
Report Location	46,746	9,299	19.9%	<b>18.9%</b>
Benton County, MO	15,671	2,711	17.3%	14.2%
Pettis County, MO	31,075	6,588	21.2%	21.3%
Missouri	4,532,155	865,642	19.1%	19.1%
United States	232,556,016	48,104,656	20.7%	20.7%

## Teen Births

This indicator reports the rate of total births to women age of 15 - 19 per 1,000 female population age 15 - 19. This indicator is relevant because in many cases, teen parents have unique social, economic, and health support services. Additionally, high rates of teen pregnancy may indicate the prevalence of unsafe sex practices.

Report Area	Female Population Age 15 - 19	Births to Mothers Age 15 - 19	Teen Birth Rate (Per 1,000 Population)

## **Dissemination Plan**

A requirement of the community health needs assessment is to disseminate the final report and make it widely available to the public. Bothwell Regional Health Center's plan for sharing the CHNA with the community is provided below:

- Post CHNA on the brhc.org web site
- Promote on Facebook page, facebook.com/bothwellregional
- Distribute press release regarding findings and availability of the complete report:
  - *The Sedalia Democrat*
  - *Benton County Enterprise*
  - *Cole Camp Courier*
  - *Lincoln New Era*
  - *Windsor Review*
  - KDRO/KPOW
  - KSIS/KIXX
  - KAYQ
  - Sedalia Area Chamber of Commerce weekly e-newsletter
  - Warsaw Chamber of Commerce e-newsletter

Requests for printed copies may be made by contacting Bothwell Marketing at 660-827- 8855 or [info@brhc.org](mailto:info@brhc.org). Printed copies for review will be available at:

- Bothwell Regional Health Center Marketing Office
- Katy Trail Community Health
- Pettis County Health Center
- Pettis County Community Partnership
- Sedalia Senior Center
- Warsaw Senior Center
- Benton County Health Department

Many of the places provided with a printed copy serve lower socioeconomic populations, medically underserved and the chronically ill.

## **Community Resources**

### **Medical Services**

#### **Bothwell Regional Health Center**

601 East 14th Street  
Sedalia, MO 65301  
660-826-8833

[www.brhc.org](http://www.brhc.org)

Bothwell Regional Health Center has served Sedalia and west-central Missouri since 1930. With a staff of more than 900 employees and 100 physicians, Bothwell is a comprehensive health care system committed to providing exceptional, cost-effective and compassionate health care to meet the needs of the Sedalia community and its surrounding areas. Bothwell provides a full range of diagnostic, medical and surgical services. These services include cancer and cardiovascular care, emergency services, orthopedics, obstetrics, critical care, diagnostic imaging, medical equipment, and community outreach and education.

#### **Katy Trail Community Health**

821 Westwood Drive  
Sedalia, MO 65301  
1-877-733-5824 and 660-826-4774

[www.katytrailcommunityhealth.org](http://www.katytrailcommunityhealth.org)

Katy Trail Community Health (KTCH) provides primary health care for the community. KTCH has four locations in central Missouri to serve surrounding communities: Sedalia, Warsaw, Versailles and Marshall. KTCH is a federally qualified health center that offers medical, dental and behavioral health services.

#### **Pettis County Health Center**

911 East 16th Street  
Sedalia, MO 65301  
660-827-1130

[www.pettiscountyhealthcenter.com](http://www.pettiscountyhealthcenter.com)

Pettis County Health Center is a local public health agency that is supported by local taxes, reimbursement from federal and state programs and a sliding fee-for-service scale based on household income. Available services include general health and wellness screens, communicable disease control activities including immunizations, numerous child and adolescent health/safety programs, women's health services, WIC (Women, Infants, and Children) Food Supplement Program and environmental public health services.

## **Dental Services**

### **Katy Trail Community Health**

821 Westwood Drive

Sedalia, MO 65301

1-877-733-5824 and 660-826-4774

# What Does Pettis County Community Partnership Offer?

**Pettis County Community Partnership (PCCP)** .... serving Pettis, Morgan and Benton Counties  
1400 S. Limit, Ste. 29 (660) 827-0560, voice (660) 827-0633, fax  
Sedalia, MO 65301 1-855-827-0560 (toll free)  
www.pettiscommunitypartners.org on facebook: Pettis County Community Partnership

Our conference/meeting room is in Suite 28-A (2 doors south of our offices).

## **Youth and Family Services: Adolescent Coalition partner and the following:**

**Choosing the Best:** We can provide materials for this research-based prevention program wjicj was designed to motivate youth to choose abstinence.

**Baby Think it Over:** To augment teen pregnancy prevention efforts in our area we have computerized babies that simulate what it is like to care for an infant. Additional materials include abstinence and infant safety. We have twenty diverse simulators of both genders, as well as infant carriers, fully-equipped diaper bags (diapers, bottles, formula, blankets, clothing, etc.) available to loan to schools, youth groups, scouts, and teen-serving organizations in our service area. (Free of charge as long as returned in same good condition.)

**Fatherhood Initiative:** We are partnering with Powerhouse Ministries in Marshall to bring "Fathers Committed to Families" to Pettis and Morgan counties. A substantial body of research documents that fathers bring many benefits to the lives of their children. This research highlights the importance of resident and non-resident fathers to their children's well-being. Many scientific studies link positive fatherhood involvement with: lower levels of lying, disruptive behavior, and depression; fewer externalizing and internalizing behaviors and less delinquency; higher self-esteem; and less sexual risk (later sexual debut, fewer partners, less likely to be diagnosed with a sexually transmitted disease).

The program initially targeted high risk fathers, young fathers, fathers facing poverty, fathers who have recent or long term lack of employment, fathers with a family history of legal issues or substance abuse, or fathers who have limited experience in interacting with their children. Through teaching the curriculum we have learned that fathers of all ages and stages can benefit from completing the Fatherhood course. And, men thinking about becoming fathers will greatly benefit from the curriculum and learning from existing fathers.

## **Food and Shelter:**

**MRCC Food Co-op:** Partnering with the Missouri Rural Crisis Center, once each month we are able to offer people approximately \$40 worth of groceries for \$22. Co-op members pay an annual membership fee of \$10 and the \$22 monthly co-op fee each month they receive an order of food which includes bread, produce, paper products, and canned goods, as well as MRCC's own Patchwork Farms meat products. Members may request multiple orders at the same price per order. Additional meat may be ordered at reasonable rates. All participants of the food cooperative must be current MRCC members. Anyone may participate, regardless of income.

**PCCP Housing Services:** PCCP receives grants from various sources in order to assist people who are literally homeless, or imminently homeless, in securing stable housing. Skilled case managers interview potential clients to determine whether or not the client meets the funder's requirements for assistance. Assistance may be provided, as funds are available, to people who qualify. Determination is made on a case-by-case basis. Applications must be made in person. The list of items required for making an application is at the end of this section (see page 5).

**P.R.O.P. – Putting Roofs Over People:** PCCP facilitates this group of community partners to look at needs and coordinate resources to assist people who are homeless or imminently homeless. PCCP, Sedalia Housing Authority, MO Valley CAA, Open Door, Salvation Army, Habitat for Humanity, DFS, Sedalia Schools, CASA, The Embassy, churches, businesses, and individuals work together to combat homelessness and provide transitional housing assistance. The P.R.O.P. coalition is a mix of over 50 service-providers and caring people working to help the homeless and hurting. It meets at PCCP on the 4th Monday of each month.

**Offender Reentry:**

**MO Reentry Process Steering Group:** Community partners share and coordinate resources around housing, education, family support, employment, mental health and other issues. All with an interest in reentry are welcome to attend. Meetings are held on the first Monday of each month at noon in the PCCP conference room.

**Reentry Resources:** Ex-offenders get a free Resource Guide and visit with our staff to find out where to access what they need to have a smoother transition back to the community.

**Multicultural Services:** Cherishing diversity of our residents, PCCP strives to heighten cultural awareness and appreciation.

**West Central Missouri Multicultural Forum:** This group brings people and regional resources together to proactively (and reactively if necessary) address issues relating to education, health and welfare, business and industry, law enforcement, government, transportation, and community service learning. The Forum currently meets on an “as needed” basis. All are welcome.

**Family Nutrition Education (Spanish):** Our educators help families learn how a well-balanced meal promotes child development and adult health. University of MO Extension is our partner.

**Cultural Awareness Activities:** Periodic events such as Martin Luther King Day, Make A Difference Day and Global Village are the types of activities we have sponsored.

**Volunteer Programs:**

**Open monthly meetings hosted by Pettis County Community Partnership:**

- Missouri Reentry Process (MRP) of Pettis County--addressing reentry issues: 1<sup>st</sup> Monday at noon.
- Inter-Agency of Pettis County--addressing community needs: 2<sup>nd</sup> Monday at noon.
- P.R.O.P. Putting Roofs Over People--addressing homelessness issues: 4<sup>th</sup> Monday at 11:00 am.
- And others. . .

**Pettis County Community Partnership's (aka "The Green Sheet")  
PROP (Putting Roofs Over People) Housing Program Process**

**\*\*ALL ADULTS IN HOUSEHOLD MUST COMPLETE AN APPLICATION**

**To process your application for assistance, we MUST first have all of the following:**

1. Photo ID for everyone 18 years and older in the home
2. Social Security Cards for everyone in the home
3. Proof of Income (ALL that apply to applicant household)
  - a. Paystubs for the most recent 30 days
  - b. Alimony/Child Support Payment Verification
  - c. Interest or Dividend Income
  - d. Self-Employed – last tax return & fill out Self-employment verification form
  - e. Bank statement printout for checking & savings for 6 months (avg. balance)
  - f. Certificate of Deposit (CD) statement
  - g. Money Market Account statement
  - h. Armed Forces Income
  - i. Unemployment Income
  - j. Whole Life Insurance Policy
  - k. Food Stamps/TANF
  - l. All Other Income or Cash
  - m. Rental property value
  - n. Real estate property value
  - o. Social Security Award Letter – Current
4. Eviction Notice/Foreclosure/Utility Shut-Off Notice
5. Existing/current lease or mortgage statement (signed & dated)
6. Intent to Rent (we provide as necessary)

**In order to provide housing or utility assistance, all housing units MUST pass a housing inspection—the unit must be SAFE, DECENT and SANITARY**

**This means that:**

- All utilities MUST be on & working**
- All windows, doors, lights and plumbing must work!!!**
- It must have working smoke detectors.**
- There can be NO broken or boarded up windows or doors.**
- If there are more than two steps, there must be a sturdy handrail.**

**PLEASE NOTE: No guarantees for assistance will be made until all documents are provided and approved, and the unit passes our inspection!!!!**

**Tips to seeking and receiving services as you utilize this guide:**

Don't call an agency and expect services: most cannot provide help over the phone. If you have a question that you want answered, feel free to call and ask. However, if you are seeking services, service-providers require you to be in their office, in-person, with documentation of need.

You are more likely to receive nice, kind and helpful service if you are nice, kind and honest about your situation.

Revised 9/14/16

WIC 827-4599

Pettis County Health Center is a local public health agency that is supported by local taxes, by reimbursement from federal and state programs and by a sliding fee-for-service scale based on household income. Available services include general health and wellness screens, communicable disease control activities including immunizations and STD's, numerous child and adolescent health/safety programs including car seats and bike helmets, women's health services including family planning and Show Me Healthy Women for older women, health education activities. WIC (Women, Infants, and Children) Food Supplement Program, and environmental public health services. Certified Copies of Birth and Death certificates are available in the office for a fee, but only if the birth or death occurred in Missouri.

It is the policy of the Pettis County Health Center to provide equal services to all applicants without regard to race, color, religion, gender, age, national origin, political belief, veteran status, and physical or mental disability.

At Pettis County Health Center we also now offer a Breastfeeding Drop Center for moms who have concerns or worries about breastfeeding can drop in during office hours to have their babies weighed and speak with a lactation consultant or other trained breastfeeding staff. Breastfeeding classes are available monthly. We also have a breastfeeding helpline that is answered after hours.

**The Embassy**

660-596-4427

The Embassy is a non-denominational, faith-based restoration ministry. The Embassy leads men and women who are in a normalcy of brokenness, deception, and manipulation to a new normalcy of a productive and joyful life in Christ.

The program is designed for men and women who recognize they have life controlling problems and desire to change their life through a personal relationship with Jesus Christ. The program consists of spiritual and secular development.

The spiritual development leads one through Christian fundamentals, study of the Bible, church attendance, and discipleship study. The secular development leads one through setting goals, education planning, gaining employment, and managing health and finances. Please visit our website, [theembassyinc.org](http://theembassyinc.org), for more information.

## Are there any Faith-Based Restoration Ministries?

**The Embassy** 660-851-2283  
The Embassy is a non-denominational, faith-based restoration ministry. The Embassy leads men and women who are in a normalcy of brokenness, deception, and manipulation to a new normalcy of a productive and joyful life in Christ. The program is designed for men and women who recognize they have life controlling problems and desire to change their life through a personal relationship with Jesus Christ. The program consists of spiritual and secular development. The spiritual development leads one through Christian fundamentals, study of the Bible, church attendance, and discipleship study. The secular development leads one through setting goals, education planning, gaining employment, and managing health and finances. Please visit our website, [theembassyinc.org](http://theembassyinc.org), for more information.

## What multicultural services are available?

## Is there help for ex-offenders returning home to Pettis County?

MO Reentry Process Steering Team Community partners share and coordinate resources around housing, education, family support, employment, mental health and other issues. All with an interest in reentry are welcome to attend. Meetings are held on the first Monday of each month (except July) at noon in the PCCP conference room. 1400 S. Limit, Ste. 28-A in the State Fair Shopping Center.

Pettis County Community Partnership 1400 S. Limit, Ste 29 (State Fair Shopping Center) 827-0560  
Ex-offenders can meet with our staff to find out where to access resources they need to have a smoother transition back to the community. Currently, we have no employment training opportunities available.

Pettis County Jail Ministry Team

"Smitty" (James M. Smith) 660-343-5779  
Chaplin Bill Griffith 660-221-2293

### KAIROS OUTSIDE

for more info contact: Martha 660-826-3649

Kairos Outside is designed to support the families of men and women who are, or have been incarcerated in the state and federal correctional facilities, as well as county jails and other offender programs. Kairos Outside provides a support weekend for women who have a relative or friend who is, or has been, incarcerated.

The spouses, parents, other relatives and friends of the incarcerated often "do time" right along with their relative or friends. It is important for them to know that they are not alone and that there is a Christian Community that cares about them. This support is provided in a safe environment where they will have a chance to interact with other women who are in similar situations and learn how to form small groups of support thereby giving them strength in their life journey. Please visit [www.koeastmo.org](http://www.koeastmo.org)
