II. Terms of Use Patient Portal Guidelines and Security

How our Secure Patient Portal Works

The Patient Portal is a webpage that uses encryption and other security measures designed to keep unauthorized persons from reading communications, information, or attachments. Secure messages and information are designed to be read only by someone who knows the right password or pass-phrase to log in to the Patient Portal site.

Availability of the Patient Portal

Access to this secure Patient Portal is an optional service, and may be suspended or terminated at any time and for any reason. If service is suspended or terminated, we will notify you as promptly as we reasonably can.

How to Use our Patient Portal:

1. Request access from Bothwell Regional Health Center. To register you must be at least thirteen (13) years old.
2. Review the Patient Portal User Agreement and electronically submit the Agreement by clicking Accept. **Note: If enrolling electronically by selecting "Accept" you are indicating that you have read and fully understand the User Agreement, therefore creating an electronic signature of acceptance.*
3. If enrolling in person, please sign and bring in the completed Agreement to abide by the Patient Portal Terms of Use.
4. After Agreement to Abide by the Patient Portal Terms of Use is completed or accepted, you can expect to see a "Welcome" email. This email will instruct you on how to complete enrollment, create login and password.
5. If enrolled by Health Information Management, once logged into the Portal, you should go to "Preferences" on the bottom of the page to change your password to something only you will know. This is essential to ensure your information remains secure and private.
6. After the above is completed you should be all set to use the Patient Portal.

Protecting Your Private Health Information and Risks:

This method of communication and viewing information through the Patient Portal is designed to prevent unauthorized parties from being able to access or read messages while they are in transmission by using encryption. Other security measures protect information maintained within the Patient Portal site. The website for the Patient Portal has trusted site certificate, which is viewable from your browser’s task bar. (You can learn more about trusted sites by going to <http://windows.microsoft.com> and searching: “When to trust a website.”)

Keeping messages secure depends on two (2) additional factors: (a) the secure message must reach the correct email address, and (b) on the authorized individual must be able to get access to it. Only you can make sure these two (2) factors are present. We need you to make sure that we have your correct email address and are informed if it ever changes. You also need to keep track of who has access to your Patient Portal account, so that only you or someone you have authorized can see messages received or other information in your Patient Portal. You should protect your Patient Portal login information from anyone whom you do not want to access your Patient Portal account and notify us immediately of any unauthorized use of your login information or if you believe that your login is no longer confidential.

We will not answer questions or send protected health information by regular email. Even with these security measures, we cannot guarantee the confidentiality, security or integrity of Patient Portal information. To the fullest extent allowed by law, you agree to not hold Bothwell Regional Health Center, its physician practices, its physicians, providers or any of its staff liable for network infractions beyond our control.

This agreement does not allow the patient or proxy access to medical records not already in this portal. Medical records not included in the patient portal will have to be requested from the Health Information Management Department at Bothwell Regional Health Center.
